

CIMC 

Important Notice

The Board of Directors of the Company, the Supervisory Committee and the Directors, Supervisors and senior management of the Company warrant that there are no material omissions from, or misrepresentation or misleading statements contained in this interim report (this "Report"), and jointly and severally accept full responsibility for the truthfulness, accuracy and completeness of the information contained in this Report.

This Report has been reviewed and approved at the 13th meeting of the seventh session of the Board in 2015. All of the eight Directors of the Company have attended the Meeting.

The financial statements of the Group have been prepared in accordance with China Accounting Standards for Business Enterprises ("CASBE"). The interim financial statements and notes (the "Interim Financial Report") of the Group for the six months ended 30 June 2015 prepared in accordance with CASBE have not been audited.

Neither any controlling shareholder (including its subsidiaries) nor substantial shareholder (including its subsidiaries) of the Company has utilised the non-operating funds of the Company.

The Company proposes not to distribute any cash dividend, issue bonus shares or convert shares from reserves into share capital for the six months ended 30 June 2015 (the same period of 2014: Nil).

Mr. Li Jianhong, Chairman of the Board, Mr. Mai Boliang, President of the Company and Mr. Jin Jianlong, person-in-charge of accounting affairs and head of the accounting department (the financial controller), hereby warrant the truthfulness, accuracy and completeness of the Interim Financial Report contained in this Report.

This Report contains certain forward-looking statements made on the basis of subjective assumptions and judgments on future policy and economy, which are subject to risks, uncertainties and assumptions. The actual outcome may differ materially from such forward-looking statements. Investors should be aware that undue reliance on or use of such information may lead to risks of investment.

This Report has been prepared in both Chinese and English. In the event of any inconsistency between the two versions, the Chinese version shall prevail.

Definitions

For the purpose of this Report, unless the context otherwise requires, the following terms shall have the meanings set out below:

Items	Definitions
“A Share(s)” (or “RMB-denominated Ordinary Share(s)”)	ordinary share(s) issued by the Company in the PRC with a nominal value of RMB1.00 each, which are listed on the Shenzhen Stock Exchange and traded in Renminbi;
“A Share(s) Share Option Incentive Scheme”	share option incentive scheme of China International Marine Containers (Group) Co., Ltd. considered and approved at the Extraordinary General Meeting of the Company on 17 September 2010;
“Board”	the Board of the Company;
“CASBE”	Accounting Standards for Business Enterprises – Basic Standard and 38 Specific Accounting Standards issued by the Ministry of Finance of the People’s Republic of China on 15 February 2006, and application guidance and interpretations to Accounting Standards for Business Enterprises and other related regulations subsequently issued;
“CFSE”	China Fire Safety Enterprise Group Limited, a company listed on the main board of the Hong Kong Stock Exchange (stock code: 445) and an associated company of the Company;
“CIMC” or “Company”	China International Marine Containers (Group) Co., Ltd. (中國國際海運集裝箱(集團)股份有限公司), a joint stock company incorporated in the PRC with limited liability, the A Shares of which are listed on the Shenzhen Stock Exchange and the H shares of which are listed on the Hong Kong Stock Exchange;
“CIMC Enric”	CIMC Enric Holdings Limited (中集安瑞科控股有限公司), a company incorporated in the Cayman Islands with limited liability on 28 September 2004 and listed on the main board of the Hong Kong Stock Exchange (Hong Kong stock code: 3899) on 20 July 2006 and a subsidiary of the Company;
“CIMC Finance Company”	CIMC Finance Co., Ltd., a company incorporated in the PRC with limited liability on 9 February 2010 and a subsidiary of the Company;
“CIMC Financial Leasing Company”	CIMC Financial Leasing Co., Ltd., a company incorporated in the PRC with limited liability on 30 July 2007 and a subsidiary of the Company;
“CIMC Hong Kong”	China International Marine Containers (Hong Kong) Limited (中國國際海運集裝箱(香港)有限公司), a company incorporated in Hong Kong with limited liability on 30 July 1992 and a wholly-owned subsidiary of the Company;
“CIMC Raffles”	CIMC Raffles Offshore (Singapore) Limited, a company incorporated in Singapore with limited liability on 7 March 1994 and a subsidiary of the Company;
“CIMC Tianda”	Shenzhen CIMC-Tianda Airport Support Co., Ltd. (深圳中集天達空港設備有限公司), a company incorporated in the PRC with limited liability on 18 July 1992 and a subsidiary of the Company;

Definitions

“CIMC Vehicle”	CIMC Vehicle (Group) Co., Ltd. (中集車輛(集團)有限公司), a company incorporated in the PRC with limited liability on 29 August 1996 and a subsidiary of the Company;
“Corporate Governance Code”	the Corporate Governance Code contained in Appendix 14 of the Hong Kong Listing Rules;
“CSRC”	China Securities Regulatory Commission;
“C&C Trucks”	C&C Trucks Co., Ltd. (集瑞聯合重工有限公司), a company incorporated in the PRC with limited liability on 12 March 2009 and a subsidiary of the Company;
“Director(s)”	the director(s) of the Company;
“Group”, “we”, “our” and “us”	the Company and its subsidiaries;
“H Share(s)” (or Overseas-listed Foreign Share(s))	overseas-listed foreign share(s) issued by the Company with a nominal value of RMB1.00 each, which are listed on the Hong Kong Stock Exchange and traded in Hong Kong dollars;
“Hong Kong”	The Hong Kong Special Administrative Region of the PRC;
“Hong Kong Listing Rules”	Rules Governing the Listing of Securities on the Hong Kong Stock Exchange;
“Hong Kong Stock Exchange”	The Stock Exchange of Hong Kong Limited;
“Model Code”	the Model Code for Securities Transactions by Directors of Listed Issuers contained in Appendix 10 of the Hong Kong Listing Rules;
“PRC or China”	the People’s Republic of China;
“Pteris”	Pteris Global Limited, a company incorporated in 1979, listed on the main board of Singapore Stock Exchange in 1991, and then listed on Catalist in 2014 (stock code: UD3), and a subsidiary of the Company;
“Reporting Period”	the six months started from 1 January 2015 and ended on 30 June 2015;
“RMB”	Renminbi, the lawful currency of the PRC;
“SFO”	the Securities and Futures Ordinance, Chapter 571 of the Laws of Hong Kong;
“Shareholder(s)”	the shareholder(s) of the Company;
“Shenzhen Listing Rules”	Rules Governing the Listing of Securities on the Shenzhen Stock Exchange;

Definitions

“Shenzhen Stock Exchange”	the Shenzhen Stock Exchange;
“Supervisor(s)”	the member(s) of the Supervisory Committee of the Company;
“Supervisory Committee”	the Supervisory Committee of the Company;
“US\$, or U.S. dollars”	United States dollars, the lawful currency of the United States of America;and
“Ziegler”	Albert Ziegler GmbH, a company incorporated in Germany with limited liability and a subsidiary of the Company.

Glossary

This glossary contains certain definitions of technical terms used in this Report in connection with the Group. Some of these definitions may not correspond to standard industry definitions or usage.

Items	Definitions
CNG	Compressed Natural Gas;
GSE	Ground Support Equipment, refers to airport equipment used to ensure flight safety. To meet the requirements for aircraft maintenance and flights, airports are equipped with a variety of modern ground support equipment, including but not limited to mechanical, electric, hydraulic and special gas equipment;
IBC	Intermediate Bulk Container and specialised logistic equipment;
Jack-up Drilling Platform	A jack-up drilling platform is a mobile oil rig commonly used for shallow water operation. Most jack-up rigs operate in water depths ranging from 250 to 400 feet. This oil drilling equipment is generally used for mounting machinery, power supply, equipment and accommodation facilities for drilling and certain liftable spud legs on a platform floating on the water;
LNG	Liquefied Natural Gas;
Modular Building	the building that manufactured in a factory environment and transported to a prepared project site to install;
ONE Model	Optimization Never Ending, the lean management system of CIMC;
Semi-submersible Drilling Platform	A semi-submersible drilling platform is a mobile oil rig, the upper part of the hull structure is the working deck and the lower part comprises two lower hulls, with the parts connected by support columns. When in operation, the lower hulls are submerged into the water. A semi-submersible platform is generally used in deep seas with water depths ranging from 600-3,600m. The platform typically uses a dynamic positioning system for positioning;and
TEU	Twenty-foot equivalent unit, also known as a standard unit (a container with a length of 20 feet, a height of 8 feet 6 inches and a width of 8 feet), being used to measure the volume of a container.

Total non-current liabilities	14,277,238	17,153,989	(16.77)%
Total liabilities	65,362,621	60,494,066	8.05%
Shareholders' equity	30,230,870	27,282,115	10.81%
Attributable to:			
Shareholders of the parent company	25,096,672	22,290,314	12.59%
Minority interests	5,134,198	4,991,801	2.85%
Share capital (thousand shares)	2,687,085	2,672,629	0.54%

Chapter II Summary of Accounting Data and Financial Indicators

Unit: RMB thousand

	2015 ()	The same period of previous year (January – June 2014) (unaudited)	Changes from the same period of previous year to the Reporting Period (%)
Net cash flows from/(used in) operating activities	(625,453)	(3,169,073)	80.26%
Net cash flows from/(used in) investing activities	(4,915,427)	(4,160,208)	(18.15)%
Net cash flows from financing activities	6,180,113	5,887,153	4.98%

	A 2015 (30) ()	As at the end of previous year (31 December 2014) (audited)	Changes from the end of previous year to the end of the Reporting Period (%)
Balance of cash and cash equivalents at the end of the period	3,380,034	2,935,251	15.15%

II. KEY FINANCIAL INDICATORS

	2015 ()	The same period of previous year (January – June 2014) (unaudited)	Changes from the same period of previous year to the Reporting Period (%)
Basic earnings per share attributable to shareholders of the Company (RMB/share)	0.5681	0.3885	46.23%
Diluted earnings per share attributable to shareholders of the Company (RMB/share)	0.5627	0.3845	46.35%
Weighted average return on net assets (%)	6.59%	4.89%	1.70%
Weighted average return on net assets after deducting non-recurring profit or loss (%)	4.92%	4.47%	0.45%
Net cash flows from/(used in) operating activities per share (RMB/share)	(0.23)	(1.19)	80.67%

	A 2015 (30) ()	As at the end of previous year (31 December 2014) (audited)	Changes from the end of previous year to the end of the Reporting Period (%)
Net assets per share attributable to shareholders of the Company (RMB/share)	9.34	8.34	11.99%

Chapter II Summary of Accounting Data and Financial Indicators

III. NON-RECURRING PROFIT OR LOSS ITEMS AND AMOUNTS

Unit: RMB thousand

	A () 2015 ()
Loss on disposal of non-current assets	(18,377)
Government grants recognised in profit or loss for the current period	49,571
Gains or losses from changes in fair value arising from holding financial assets at fair value through profit or loss and financial liabilities at fair value through profit or loss, and investment gains arising from disposal of financial assets at fair value through profit or loss, financial liabilities at fair value through profit or loss and available-for-sale financial assets, except for the effective hedging activities relating to the Group's ordinary activities	396,253
Other non-operating income and expenses other than the above items	19,540
Effect of income tax	(40,249)
Effect of minority interests (after tax)	(23,049)
Total	383,689

Reasons and explanations on the Company's non-recurring profit or loss items as defined under the Explanatory Announcement No.1 on Information Disclosure by Companies Offering Securities to the Public – Non-Recurring Profit or Loss (the "Explanatory Announcement No.1") and the recurring profit or loss items which are listed as non-recurring profit or loss items under the requirements of the Explanatory Announcement No.1

Applicable Not applicable

Chapter III Report of the Board

I. OVERVIEW

In the first half of 2015, the global economy maintained low growth, and its recovery was slow with differentiation. Affected by the factors such as low oil prices, strong U.S. dollars and the implementation of quantitative easing monetary policies by the European central bank, the U.S. economy achieved good growth; the economy in the Eurozone held stable; the economy in Japan rallied slightly amidst the recession, and the growth of emerging countries continued to slow down. The economy in China stepped into a “new normal” with restructuring. The real economy faced downside pressure. In the first half of this year, both the revenue and net profit of the Group rose as compared with the same period of previous year. Among its principal businesses, the profit of the container manufacturing business and the road transportation vehicle business increased significantly; the logistics service

business maintained constant growth; the profit of the energy, chemical and liquid food equipment business and the offshore engineering business declined. During the Reporting Period, the Group’s revenue amounted to RMB32,637.289 million (same period in 2014: RMB32,046.128 million), and its net profit attributable to shareholders of the parent company amounted to RMB1,518.195 million (same period in 2014: RMB1,035.029 million), representing a year-on-year increase of 1.84% and 46.68% respectively.

II. REVIEW OF PRINCIPAL BUSINESSES DURING THE REPORTING PERIOD

The Group is principally engaged in the manufacture of modern transportation equipment, energy, chemical, liquid food equipment, offshore engineering equipment and airport facilities, as well as the provision of relevant services,

Chapter III Report of the Board

including the design, manufacture and service of international standard dry containers, reefer containers, regional special containers, tank containers, wooden container floorboards, road tank trucks, natural gas equipment and static tanks, road transportation vehicles, heavy trucks, Jack-up Drilling Platforms, Semi-submersible Drilling Platforms, special vessels and airport facilities. In addition, the Group is also engaged in logistics service, real estate development, finance and other businesses. Currently, the Group ranks No. 1 in the world in terms of output and sales of standard dry containers, reefer containers and tank containers and the Group is China's largest manufacturer of road transportation vehicles as well as one of the leading high-end offshore engineering equipment enterprises in China.

During the Reporting Period, the products contributing 10% or more to the Group's revenue or operating profit included containers, road transportation vehicles, energy, chemical and liquid food equipment and logistics services.

Container manufacturing business

The Group's container business mainly deals with standard dry containers, reefer containers, special reefers and Modular Building. The Group has the capacity to produce a full series of container products with independent intellectual property rights. Special reefers and Modular Building include 53-foot inland North American containers, European wide containers, bulk containers, special reefer containers, foldable containers and Modular Building products.

In the first half of 2015, under the influence of optimistic expectations for steady growth in the global container trade and launching of new ships at the beginning of this year, the market demand for containers maintained the favourable trend of previous year. The overall capacity across the industry remained stable, while the overall capacity utilisation rate was close to 60%. Since the fourth quarter of previous year, the market demand for all types of containers of the Group maintained positive. Under the impact of ongoing decline in costs of steel and other raw materials, selling prices of containers of the Group also went down, but the gross profit margin remained stable as compared with the same period of previous year.

During the Reporting Period, the total sales of the Group's ordinary dry containers were 736,100 TEUs (same period in 2014: 625,300 TEUs), representing a year-on-year increase of 17.72%. The total sales of reefer containers were 86,900 TEUs (same period in 2014: 70,700 TEUs), representing a year-on-year increase of 22.91%. The container segment recorded revenue of RMB12,478.632 million (same period in 2014: RMB11,505.248 million), representing a year-on-year increase of 8.46%, and the net profit was RMB710.009 million (same period in 2014: RMB322.720 million), representing a year-on-year increase of 120.01%. The substantial increase in the net profit as compared with the same period of previous year was mainly attributable to the substantial increase in profit from changes in fair value of derivative financial instruments in the current period as compared with the same period of previous year.

Chapter III Report of the Board

In the first half of this year, the Group seized the favourable opportunity brought by a recovery in the market and continued to increase the production efficiency to meet the market demand through exploring internal potentials. Meanwhile, it implemented the entire upgrade of the container business by adjusting and optimising the composition of the existing production capacity. The container project in Dongguan Fenggang was progressing well on schedule, and the production line in the first phase of the project was expected to commence operation next year. When expanding into the overseas markets, the Modular Building business also actively explored opportunities in the domestic market. The Group has won the bidding for the largest modularised office building project in China – Shenzhen Qianhai Business Innovation Centre.

In the first half of this year, the Group finally won the anti-dumping and countervailing investigation case filed by the U.S. against its containers after one year's efforts. In May 2014, the U.S. Department of Commerce initiated anti-dumping and anti-subsidy investigations (the "AD and CVD Investigations") on 53-foot dry cargo containers (the "53-foot Containers") imported from China. Under the Group's active responding and multilateral efforts, the U.S. International Trade Commission concluded that the products exported to the U.S. from China have not resulted in significant retard or substantial damage on the establishment of the U.S. domestic industry in the final judgement of industrial damage of 53-foot Containers imported from China (including from the Group) on 19 May 2015. Accordingly, the U.S. Customs will not impose anti-dumping and countervailing duties on 53-foot Containers imported from China. The verdict of the U.S. International Trade Commission will be in favour of the normal sales of the Group's 53-foot Containers in the U.S. market. For more details, please refer to the announcement published on the website of the Hong Kong Stock Exchange (www.hkexnews.hk) on 20 May 2015, and the announcements disclosed in China Securities Journal, Shanghai Securities News, Securities Times, Cninfo website (www.cninfo.com.cn) and the Company's website (www.cimc.com) ([CIMC] 2015-033) on 21 May 2015. Furthermore, the Group (as a plaintiff) won the case of a seven-year's dispute over a patent infringement on the APC transport platform for its inland North American containers. Upholding the value of respecting the intellectual property rights and industry rules, the Group safeguarded its legal rights and interests, which was also beneficial to improve the industry environment and the sustainable development of the container industry.

Road transportation vehicle business

In respect of the road transportation vehicle business, the Group has established different product lines for special vehicles consisting of 10 series and more than 1,000 models, including container semi-trailers, flatbed/staked-side semi-trailers, low-flatbed semi-trailers, vehicle loaded semi-trailers, stake trucks, van trucks, tank trucks, dump trucks, sanitation trucks and special vehicles. These products cover major domestic and international markets.

In the first half of 2015, under the pressure from the national energy restructuring and the environmental protection requirement, the demand of the domestic coal market remained low; the steel industry suffered from a serious overcapacity; and the growth rate of investments on fixed assets; such as real estate and infrastructure construction, slowed down. The domestic demand for special vehicles slumped with a drop of nearly 20% in the sales of logistics semi-trailers and a drop of nearly 70% in that of construction vehicles year on year. In respect of the overseas markets, in North America, the increased demand in the freight transport logistics spurred a substantial growth in the demand for special vehicles; in emerging markets, the demand was huge in spite of differentiated economies. With the launch of the "One Belt and One Road" project, the emerging market business of the road transportation vehicle business of the Group maintained a steady growth, and the expansion in key markets was in smooth progress.

During the Reporting Period, the Group's road transportation vehicle business achieved sales of 59,491 units (same period in 2014: 57,176 units), representing a year-on-year increase of 4.05%. It recorded revenue of RMB6,682.115 million (same period in 2014: RMB7,144.948 million, excluding the heavy truck business), representing a year-on-year decrease of 6.48%, and achieved net profit of RMB318.726 million (same period in 2014: RMB225.726 million, excluding the heavy truck business), representing a year on-year increase of 41.20%. The increase in net profit was mainly attributable to the increase in the operating gross profit margin as compared with the same period of previous year driven by the business growth in the North American market.

In the first half of this year, the Group's road transportation vehicle business continued promoting the global operation management steadily, strived to enhance the operational efficiency of assets of each business unit and the corporate profitability, and focused on the investment and development of the incremental business and the innovation business of each business unit.

Chapter III Report of the Board

In the Chinese market, the Group actively explored the weak market and energetically enhanced the market share. The Group enjoyed an increase of 3.3 percentage points to 23.5% in the market share of logistics semi-trailers and an increase of 4.2 percentage points to 16.1% in the market share of construction vehicles. However, as affected by the general decline in the Chinese market, both the sales and profits of the domestic business of the Group decreased during the Reporting Period.

In the overseas markets, the Group's road transportation vehicle business operated well overall in the first half of this year. In the North American market, the Group continued to optimise the business structure to focus on maritime dry cargo van trucks and skeleton trucks and explored incremental businesses through the expansion strategies such as construction of new factories. In the emerging markets, the Group made utmost efforts to expand markets in South America, Russia, the Middle East, Southeast Asia and Africa, and recorded significant year-on-year increases in the sales and profits of these two overseas businesses during the Reporting Period.

Energy, chemical and liquid food equipment business

Chapter III Report of the Board

Offshore engineering business

The Group is one of the leading contractors of high-end offshore engineering equipment in China and has been participating in the competition of the international market of offshore engineering business all the time. The Group's offshore engineering business is mainly operated by CIMC Raffles and its subsidiaries. Our main products include Jack-up Drilling Platforms, Semi-submersible Drilling Platforms, and auxiliary vessels for offshore engineering projects.

Since 2015, as the global oil price has been traded at a low level and major oil companies internationally have cut investments in exploration and development and have postponed the development of some large projects due to increasing costs and strained cash flows, new orders on offshore drilling platforms globally in the first half of this year dropped sharply; there was no new order on the Semi-submersible Drilling Platforms; and there were only three orders on the Jack-up Drilling Platforms, representing a year-on-year decrease of approximately 90%. Domestically, policies were beneficial to the Group's development in respect of the offshore engineering business: the strategic concept of "One Belt and One Road" has brought opportunities for the high-end marine engineering equipment in China in the development of offshore oil and gas alongside. The Guidance on the Finance Industry Providing Support for the Transformation and Upgrading of the Shipbuilding Industry was approved by the State Council in April. As one of the first offshore engineering "whitelist" members, CIMC Raffles will get more support in terms of credit financing and other respects. In May, the State Council issued the strategy of "Made in China 2025", according to which the offshore engineering equipment industry became one of the ten areas with key development. In May, Mr. Li Keqiang, Premier of the State Council visited the world's sole D90 project model of the 7th-generation ultra-deepwater Semi-submersible Drilling Platform developed by CIMC Raffles during his visit to the "Chinese Equipment Manufacturing Exhibition" in Brazil, and further proposed the idea of upgrading "Made in China" with "Chinese Equipment" in June.

During the Reporting Period, the offshore engineering business of the Group recorded sales revenue of RMB5,043.275 million (same period in 2014: RMB5,665.789 million), representing a year-on-year decrease of 10.99%. Besides, the Group achieved net profit of RMB18.658

million (same period in 2014: RMB49.467 million), representing a year-on-year decrease of 62.28%. The decrease in revenue and net profit was mainly due to the decrease in business volume of the offshore engineering segment as the offshore engineering market, affected by the sharp fall of the international oil price since September previous year, entered into a stage of adjustment.

In the first half of this year, CIMC Raffles continued to focus on Semi-submersible Drilling Platforms and Jack-up Drilling Platforms. In January, the upper and lower parts of the Semi-submersible Drilling Platform – "North Dragon" built for the NSR (a Norwegian company) were successfully assembled in the base of Yantai; in April, "COSL Prospector", the fourth Semi-submersible Drilling Platform constructed for China Oilfield Services Limited, was driven to South China Sea and was completed for its first drilling in July; in May, the Jack-up Drilling Platform "CPOE 15" was delivered to CNPC Offshore Engineering Company Limited; in June, a deepwater semi-submersible living platform – CR600, 100% independently designed by CIMC Raffles, commenced operation. In addition, two D90s under construction of the world's first 7th-generation ultra-deepwater Semi-submersible Drilling Platform progressed well since the operation commencement, and one of them held a ceremony of assembly in May this year. Since October 2010, CIMC Raffles has successfully delivered 8 Semi-submersible Drilling Platforms and 10 Jack-up Drilling Platforms, operating in North Sea of Europe, Brazil, West Africa, South China Sea and other mainstream offshore engineering markets globally with sound performances, winning recognition of mainstream markets and mainstream customers. So far, both the number of Semi-submersible Drilling Platforms and the number of Semi-submersible Drilling Platforms under construction delivered by CIMC Raffles occupied over 60% of the domestic market. CIMC Raffles has become the largest construction base of Semi-submersible Drilling Platforms in China, and is also the only domestic offshore engineering business which is capable of design and construction for mass Semi-submersible Drilling Platforms.

As for R&D and design, CIMC Offshore Research Institute, which is wholly owned by the Group and functions as the "technology innovation platform", integrated the key enterprises in the industry, including U.S. ABS, Norway DNV and China CCS etc., educational and research institutions such as Ocean University of China, as well as design teams and core equipment vendors, to form a projectbased collaborative R&D platform.

Chapter III Report of the Board

Logistics service business

The Group is committed to offering logistics solutions for customers in different industries by utilising a series of logistics equipment and technologies to continuously improve the logistics in the industries. The Group's logistics services business segment completed the deep integration of business lines at the beginning of this year, and currently there are five business lines: container services, integrated logistics, project logistics, supply chain logistics and equipment logistics.

In the first half of 2015, the domestic logistics service industry maintained the overall trend of steady development. The growth of the scale of logistics demands declined, and the total social logistics costs grew slowly. The logistics industry entered into the stage of restructuring and gradually transformed from traditional logistics to integrated logistics. Amidst the slight decline in growth of logistics demands, the total logistics amount of units and individuals maintained rapid growth, and the growth rate of the logistics demand of high-tech industries was faster than that of traditional industries. The logistics of high-tech industries with high value addition and low logistics volumes, such as medicine, communications equipment and electronic component manufacturing, developed rapidly.

During the Reporting Period, the Group's logistics service business achieved sales revenue of RMB4,267.810 million (same period in 2014: RMB3,424.920 million), representing a year-on-year increase of 24.61%, and net profit of RMB57.474 million (same period in 2014: RMB41.406 million), representing a year-on-year increase of 38.81%. The increase in net profit was mainly attributable to the increase in revenue as compared with the same period of previous year.

In the first half of this year, the business lines proactively expanded new businesses underpinned by strengthening internal integration and reinforcing existing businesses to create a CIMC logistics ecosystem: (1) In respect of the container services business: including the container ship freight agency business for containers and the full-life cycle business for containers. In the first half of this year, such business line strengthened internal integration. Meanwhile, following the national strategy of the "Yangtze River Economic Belt", it carried out the route operations along the coasts and the rivers, and developed the cross-border logistics service capability based on the Yangtze River water transportation, water-railway collaborated transportation, and river-railway collaborated transportation; under the

concept of "Internet plus", it actively explored the transformation of its business model, and aimed to create a cloud platform of business services through relying on the Group's strength and customer resources. (2) In respect of the integrated logistics business: it took advantage of the port logistics resources, focused on the industries with

Chapter III Report of the Board

Heavy truck business

The Group operates the heavy truck business through C&C Trucks. In 2014, the Group increased its shareholding interest in C&C Trucks to 66.24% and took the controlling stake of C&C Trucks by increasing capital and acquiring equity interests from other shareholders. C&C Trucks positions its products in the mid-end to high-end heavy truck market in the international market and the high-end heavy truck market in the domestic market. It has established the product development strategy of “leading domestic techniques and following foreign techniques” and the development strategy of “making high-end products, providing quality services, and creating first-class brands”. Its key products include tractors, mixer trucks, dump trucks, granule tank trucks and LNG trucks.

In the first half of 2015, the domestic economy in China remained in adjustment. The real estate industry continued its depression. The infrastructure construction projects in numerous areas were operating under capacities. And there was a serious shortage of demand for heavy trucks. On 1 January 2015, the national IV standard emission regulation was implemented nationally. A large stock of national III standard trucks was registered in advance at the end of previous year. And the prices of national IV standard trucks were higher than those of the national III standard trucks. The users’ acceptance in some areas was not high. In addition, there was a downturn in the logistics market and users remained cautious. Affected by these, the overall sales of the domestic heavy truck market (including finished vehicles, non-complete vehicles and semi-trailer tractors) in the first half of this year was 295,500 (same period in 2014: 429,100), falling by 31% year on year. In respect of products, high-end and high-horsepower tractors became the mainstream of the industry, with the horsepower expanded above 400 horsepower. Capitalising on development of the logistics and transport industry and implementation of the phase-out policy for yellow-labelled vehicles, the number of orders for artery logistics tractors, hazardous chemical transport vehicles, and port tractors increased significantly year on year. Narrowed price differences between oil and gas and short-time loss of the advantage of natural gas costs led to a considerable reduction in the sales volume of natural gas heavy trucks.

Chapter III Report of the Board

In the first half of this year, the Group's boarding bridges business strived to expand into the U.S. market apart from maintaining the absolute advantage in the domestic market; the automated logistics systems business made efforts to record breakthrough in large and rapid sorting projects to enhance its competitiveness and its position in the globe; the fire and rescue vehicles business continued to accelerate its distribution and integration in the European industries. During the Reporting Period, the Group's airport facilities equipment business recorded sales revenue of RMB883.084 million (same period in 2014: RMB750.752 million), representing a year-on-year increase of 17.63%. It incurred the loss of RMB47.245 million (same period in 2014: loss of RMB46.091 million), representing a year-on-year increase of 2.50%. The increase in revenue and loss in the first half of 2015 was mainly attributable to the effect of incorporating Pteris into the scope of consolidation during the Reporting Period.

The Group's airport facilities equipment business has experienced sales teams, and has established a standardised and organised marketing management system. At the same time, the good customer relations and market network resources of the airport field can well assist and promote the expansion of the Group's air cargo handling systems, GSE and airport fire vehicle businesses in this field. The marketing team of the fire vehicle business has also been initially established in China, which has reversed the weak position in the Chinese market.

On 27 February 2015, the Group entered into an agreement for assets transfer with CFSE (Hong Kong stock code: 445). Pursuant to the agreement, the Group agreed to transfer 40% shares of Ziegler to CFSE, and obtained 30% shares of CFSE as enlarged as the consideration. On 10 July 2015, the agreement was completed and Ziegler became an associated company of CFSE and also an indirect non-wholly-owned subsidiary of the Group. The Group became the single largest shareholder of CFSE and owned its 30% shares. CFSE became an associated company of the Group. Following completion of the acquisition, the superior resources of Ziegler and CFSE will achieve mutual coordination and sharing under the unified deployment of the Group's airport facilities equipment business segment, thus forming stronger market competitiveness and laying a good foundation for fire rescue services to further expand in the Chinese market.

Real estate development business

In the first half of 2015, the domestic property policy continued the easing tone of 2014. Under the background of stabilising growth, adjusting structure, and promoting consumption, the central bank has conducted a continuous cut of reserve and interest rates, and has lowered the credit threshold. As corresponding to the "New Policy on 30 March", the down payment ratio of each city has shown a reduction in different degrees. The local governments have also put forward housing fund relax, financial subsidies and other policies to promote housing destocking, and provide more supports for the housing improvement demand. With the positive impact of multiple policies, the gradual recovery trend of the property market has been basically established.

During the Reporting Period, the Group had a total of 327,000 square metres of real estate projects under construction, 70,000 square metres of which were new construction projects, and 37,000 square metres of projects were completed. During the Reporting Period, the Group's real estate business recorded revenue of RMB238.713 million (same period in 2014: RMB221.042 million), representing a year-on-year increase of 7.99% and net profit of RMB139.116 million (same period in 2014: RMB67.733 million), representing a year-on-year increase of 105.39%. The net profit increase was mainly attributable to the increase in the profit of the associated company, Shanghai Fengyang.

In the first half of this year, the first industrial estate project of the Group – Dongguan CIMC Intelligence Valley has begun its investment invitation. As of 30 June 2015, the total contract area of the CIMC Intelligence Valley amounted to 21,061 square metres (including the Group's container headquarters building), and the total contract amount reached RMB242 million, which has laid a good foundation for the park zone's investment invitation.

Chapter III Report of the Board

On 23 July 2015, Qianhai & Shekou Area (Shenzhen) (the "Qianhai Area") of China (Guangdong) Pilot Free Trade Zone announced the Implementation Plan for the Construction of Qianhai & Shekou Area (Shenzhen) of China (Guangdong) Pilot Free Trade Zone, determining that centring around the overall objective which is to build the Qianhai Area into a demonstration area for in-depth cooperation among Guangdong, Hong Kong and Macao, a key hub for the 21st Century Maritime Silk Road, and a first mover of the new round of nationwide reform and opening-up, the Qianhai Area focuses on finance, modern logistics, information services, technology services and other strategically emerging services, to be established as a pilot and demonstration window for the opening-up of the Chinese financial industry, an important world base for trade in services and an international hub port. The Group is aiming to build the land parcel owned in the Qianhai Area into a demonstration area for maritime finance and high-end services. At present, the Group is in close negotiation with the relevant national ministries and commissions and Shenzhen Municipal Government with regard to concrete proposals on the development of the land parcel.

Financial business

The Group's financial business is devoted to establish a financial service system which matches the Group's strategic role as a leading manufacturer in the world, to enhance the efficiency and effectiveness of the Group's internal capital utilisation, and to provide various financial measures for the Group's strategy extension, business model innovation, industrial structure optimisation and overall competitiveness enhancement. The main operating subsidiaries consist of CIMC Financial Leasing Company and CIMC Finance Company.

During the Reporting Period, in respect of the financial business, the Group achieved revenue of RMB825.057 million (same period in 2014: RMB729.338 million), representing a year-on-year increase of 13.12%, and net profit of RMB590.304 million (same period in 2014: RMB62.986 million), representing a year-on-year increase of 837.20%. The increase in the net profit was mainly attributable to the income from additional profit from assets for leasing vessels of CIMC Financial Leasing Company.

In the first half of 2015, CIMC Financial Leasing Company strived to achieve role transformation in respect of early involvement and joint participation in industrial projects on the basis of deepening the connotation of integration of industry and finance, so as to provide the one-stop system solution of "equipment + finance" featuring with characteristics of CIMC for customers. Through diversified financial services, CIMC Financial Leasing Company

expanded sales of the Group's products and improved its bargaining power, therefore helping the Group to upgrade the business models and improve the overall competitiveness. CIMC Financial Leasing Company paid high concerns to the orderly progress and implementation of the Group's strategic industries and projects while vigorously promoting the sustained growth of the vehicle, energy and other fundamental businesses. In terms of the shipping finance business, Ten CMA 9200TEU container ships were delivered successfully and were put into operation, while three MSC 8800TEU container ships were delivered successfully, marking successful achievements in the integration of internal and external resources of CIMC and the innovation of the vessels contracting business model. As for the offshore engineering finance business, two SSCV semi-submersible drilling rigs maintained an average operating efficiency of more than 90%, ranking top in the platforms leased by Petrobras. The Semi-submersible Drilling Platform project under construction was in an orderly progress in accordance with the plan. As in the Modular Building finance business, the Holiday Inn Express project of CIMC Financial Leasing Company located at the Excel Exhibition Centre in East London has been successfully completed and opened for operation. The student apartment project in Newcastle, U.K. has been successfully signed and put into construction. The Group's first self-invested modular hotel project – Hampton Inn by Hilton, Bristol Airport has finished the first phase of preparation and kicked off the second phase of construction.

In the first half of 2015, with the domestic economy entering into a new normal period and China implementing a moderately easing monetary policy, CIMC Finance Company has carried out solid implementations of its functions as a "manager of centralised operation of the Group's funds, provider of comprehensive financial services, collaborator of asset-liability management, and creator of value from integration of industry and finance" and maintained stable development. During the Reporting Period, CIMC Finance Company not only further deepened centralised management of the Group's funds to achieve the Group's worldwide capital centralisation, but also coordinated the domestic and foreign funds to improve the capital operating efficiency and effectiveness, and hence reduced the Group's financial costs and liquidity risks as well as promoted the Group's asset-liability management levels. Meanwhile, CIMC Finance Company was working to seek a new value-added point of "finance + service", so as to further enrich the variety of financial services, improve the supply chain of the financial product system and successfully launch the export factoring finance business, and thus finally enhance the Group's industrial comprehensive competitiveness by providing high-value and personalised financial services.

Chapter III Report of the Board

III. FINANCIAL DISCUSSION AND ANALYSIS DISCLOSED ACCORDING TO THE REQUIREMENTS OF DOMESTIC SECURITIES REGULATORY AUTHORITIES

1. Year-on-year Changes in Key Financial Data

Unit: RMB thousand

	A (30 2015)	As at the end of the previous year (31 December 2014) (audited)	Year-on-year change	Reasons for the items with year-on-year change exceeding 30%
Financial assets at fair value through profit or loss	242,877	427,669	(43)%	Mainly due to the disposal of equity instruments for trading during the Reporting Period.
Advances to suppliers	3,389,329	5,223,351	(35)%	Mainly due to the carry-forward of advances to suppliers for equipment purchases in the previous period upon receipt of relevant equipment purchased in the current period.
Long-term receivables	5,563,364	3,449,542	61%	Mainly due to the increase in the scale of finance leases in the current period.
Development costs	90,249	41,705	116%	Mainly due to the increase in development costs in the current period.
Short-term borrowings	16,658,876	11,239,527	48%	Mainly due to the increase in demand for financing to meet the requirement of working capital.
Interest payable	68,255	185,780	(63)%	Mainly due to interest of debentures payable settled in the current period.
Dividends payable	878,901	47,973	1,732%	Mainly due to dividends of ordinary shares declared but not paid in the current period.
Other current liabilities	3,670,297	2,452,511	50%	Mainly due to the commercial papers newly issued by the Group in the current period.
Debentures payable	458,520	4,455,080	(90)%	Mainly due to the reclassification to non-current liabilities due within one year.
Other equity instruments	1,981,143	-	-	Mainly due to the issuance of RMB medium-term notes in the current period.

Chapter III Report of the Board

Unit: RMB thousand

	2015 (RMB thousand)	Same period in 2014 (January to June 2014) (unaudited)	Year-on-year change	Reasons for the items with year-on-year change exceeding 30%
Asset impairment losses	135,530	3,282	4,029%	Mainly due to increase in provision for bad debts made for receivables in the current period.
Investment income/(losses)	744,983	38,128	1,854%	Mainly due to disposal of the leasing business and increase in investment income recognised of joint ventures and associates via the equity method in the current period.
Income tax expenses	425,068	(17,892)	2,476%	Mainly due to the reversal of withholding tax of the overseas enterprises which have been identified as Chinese resident enterprises for the previous period.

Others	679,693	–	–	(28.03)%	–	–
Total	32,637,289	–	–	1.84%	–	–

During the Reporting Period, the gross profit margin of the financial business of the Group increased significantly, which was mainly attributable to the income from additional profit from assets for leasing vessels of CIMC Financial Leasing Company.

Chapter III Report of the Board

3. Analysis of Core Competitive Advantages

A development strategy focusing on core businesses to accelerate industrial upgrades

The Group has been focusing on core businesses for a long term to step up the paces of industrial upgrades, so as to enhance its industrial competitiveness. While focusing on emerging strategic businesses such as natural gas equipment and offshore engineering equipment, the Group set foot in financial, logistics services and other modern services. At present, the Group has possessed a diversified business portfolio, with an industrial ecosystem of “manufacture + service” formed. The container business continued to take the lead in the industry, as well as offshore engineering, road transportation vehicles, energy, chemical and liquid food equipment businesses with strong competitive edges in the PRC.

An enterprise framework and management system for continuous improvement and sustainability

The Group has developed a set of effective management models covering business philosophy, governance structure and management mechanism, thus establishing the competitive advantages over its rivals. A standardised and effective corporate governance structure is the institutional safeguards of the Company’s sustainable and healthy development. In recent years, the Group launched the strategic upgrade campaign of “building an empowering platform for sustainable healthy development of CIMC”. According to the organisational transformation direction of “layering management”, the Company has established a three-tier management model comprising the executive committee, special committees and the Board as well as a 5S core management process. By introducing the lean management concept and promoting the ONE Model to meet the goal of continuous improvements, the Company has established an innovative and forward-looking management system to ensure sustainable and healthy development of its businesses.

Manufacturing management capabilities ensuring high quality at low costs

With the accumulation of large-scale, serialised and standardised management experience and capabilities in the area of container manufacturing

over the years and its continuous improvements and upgrades, the Group brings into full play of its manufacturing technologies and process management with high efficiency and competitive costs as well as the core capabilities in lean production management across its business segments.

Integrated resources and collaborative development capabilities

In several business sectors, the Group has completed industrial consolidation through a series of mergers and acquisitions, and fully integrated supply chain, production and manufacturing, services and other processes to secure its leading cost advantage and leadership in the industry. Hence, on the basis of the existing resources and manufacturing and operating strengths, the Group is able to cultivate new businesses and industry chains for resource sharing and development synergy. The Group is aiming to capitalise on local strengths and integrate global resources to establish a new business ecosystem.

Technological research and development capabilities

The Group always attaches great importance to technological research and development capabilities through: developing mid-to-long term development strategies to optimise R&D systems and platforms and accelerate development of products and technologies as well as evolution of existing products; adhering to the core value of “unlimited innovations” to promote R&D of new products, technologies, processes and equipment, while constantly improving the mechanism for identifying, inspiring and promoting innovations to speed up the commercialisation of technological achievements; and strengthening protection of intellectual property rights including the construction of an intellectual property rights system covering technical secrets and copyrights, and establishing and improving an all-round effective mechanism for protecting, operating, safeguarding and preventing infringement of intellectual property rights. In addition to a national enterprise technology centre, the Group has 26 to13(of)esses and eqd(r)1dterptions, a c o

Chapter III Report of the Board

IV. PROSPECTS AND INITIATIVES

1. Industry Development Trends and Market Outlook in the Second Half of This Year

Looking ahead to the second half of 2015, the global economy will still maintain low growth with sluggish growth of international trades. Affected by policies for stabilising growth, moderately easing monetary policies and reforms in the first half of this year, the positive factors in the Chinese economy will be gradually increased. It is expected that the Chinese economy would steadily increase in the second half of this year and the full-year GDP growth would likely maintain at around 7%.

In view of the forecast of International Monetary Fund (IMF) and World Bank that the global economy would show a slower growth comparing with the beginning of the year, the global authoritative institutions relating to shipping industry decreased the estimates for growth in global container trade for 2015. Currently, the overseas demand for containers still remains slumping, while the exports by China continues to slow down. Therefore, the shipping industry is troubled by the circumstance that the growth in capacity deployment is much higher than that in cargo volume and the freight rates of the eastward and westward lines repeatedly set a new low. Also, the shipping industry is not as prosperous as expected this year, which led to a high container inventory at present, so the inventory pressure will have a great effect on the demand for containers in the second half of this year. It is expected that the demand for containers in the second half of this year will be weaker than that in the first half of this year.

In the first half of this year. In the PRC market, the government will continue to proactively stabilise the growth. It is expected that the year-on-year decrease in the special vehicles market of the PRC would be narrowed in the second half of the year. In the overseas market, given the impact from expectations on U.S. dollar rate increases, the U.S. imports are expected to continue to rise, and the manufacturing industry is likely to see a sustained moderate growth, while the demand for major products such as semi-trailers will remain stable. The emerging markets will witness a relatively stable demand. New growth force is predicted to focus on ASEAN members, "BRIC countries" and Saudi Arabia in the Western Asia.

In the second half of this year, the recession in respect of natural gas equipment is expected to sustain in the second half of this year affected by the factors such as constantly low oil prices. The Group's energy equipment business will suffer pressure in respect of short-term operation due to effects of the weak performance of the industry as a whole and intensified competitions from existing competitors and new market players, but its long-term prospects are substantially positive. The cyclical volatility trend is expected to sustain in the chemical market where the chemical equipment business is operated in the second half of this year. The overall market trend of the liquid food business is expected to remain stable in the second half of this year.

In the second half of 2015, the international oil prices are expected to continue to remain low. The businesses of oil service companies will be affected, leading to an industry reshuffle. The global offshore equipment industry will continue the downturn in the first half of this year. In addition, after the peak of new orders for Jack-up Drilling Platforms in the first half of this year, the demand for Jack-up Drilling Platforms is expected to decline in the second half of this year.

Chapter III Report of the Board

in the second half of this year, as China accelerates the building of "One Belt And One Road", investment in infrastructure construction and transport and logistics are expected to recover growth. In consideration of the current destocking speed of real estate developers and the realisation of affordable housing's annual target, the real estate investment demand may also appear signs of improvement at the end of the third quarter. The domestic heavy truck market is expected to turn for the better in the second half of this year with a strong increase in sales of engineering vehicles as compared with the first half of this year. Artery logistics tractor and hazardous chemical transport vehicle will continue the growing trend and the growth will be expanded with steady sales of natural gas heavy truck.

in the second half of this year, it is expected that the airport ground equipment business would continue to grow steadily, and main market opportunities arise from new demands in emerging markets. The peripheral facilities of the boarding bridge business will be the new direction for future business expansion. The automated processes of various industries and the rapidly growing e-commerce in China have become a vital driving force for the growth of automated logistics business. The fire and rescue equipment business has seen a basically stable competition landscape globally and will enter into a fast-developing stage in respect of the Chinese market, with huge market room and opportunities for industry integration.

under the favourable atmosphere resulting from the state policies and the stable and yet loose monetary environment, the real estate market in the PRC will maintain its recovering momentum as a whole in the second half of this year. Although its new construction projects will still see a year-on-year decrease, the degree of decrease will be narrowed, with accelerating investment and increasing sales. However, the economic environments in the PRC and abroad are still complicated and the differences among cities become more significant. The centralisation of the domestic real estate market will be further enhanced. With increasing cooperation between the finance industry and the real estate industry, the integration and innovation of the industrial chains will become a new model of development and profit-making.

in the second half of this year, it is expected that the domestic finance lease industry would keep forging ahead. Due to the intensifying competition of the industry, its level of profitability will decrease. In

the meantime, the real economy of the PRC may remain sluggish and CIMCVL will be exposed to the increasing credit risk of its customers. For the international market, it is expected that the U.S. Federal Reserve would raise interest rates, which will bring relatively significant effects to the large financing projects denominated in US dollars. Also, the exchange rate reform of RMB will keep moving towards market oriented approach, and thus the risk of exchange rate fluctuation of RMB will increase.

2. Major Risk Factors of the Group

In the second half of 2015, the Group will still be exposed to the following macroeconomic and policy adjustment risks against its business environment:

- (1) The global economy will still suffer slow recovery with slow growth and low trade flow. China's economy has entered into a stage of "new normal" which requires restructuring. The demand growth has slowed down while exports are also in a stage of slowing growth and structural transformation with relatively short demands. Meanwhile, certain industries will suffer over-capacities with low utilisation rates, imposing large pressure on competitions and facing risks in respect of declines of profit margins.
- (2) Costs will continue to rise sharply due to mid-to-long term challenges including a decreasing demographic dividend and the requirements on low carbon, environmental protection, energy conservation and emission reduction. Costs of various resources such as land and warehouse and distribution facilities will also rise constantly. The costs together will further squeeze profit margins of the real economy. In the future, the automation with robots as the representative is becoming a key aspect of upgrade of the manufacturing industry in the future, therefore, the Chinese manufacturing industry is generally confronted with adjustments and changes in the employment structure.
- (3) RMB exchange rate will be exposed to great fluctuation risks due to various changing factors and great volatility in the global financial market.
- (4) The offshore engineering equipment industry has investment risks as it calls for large investments and long development cycles. New orders placed by major customers may decrease dramatically as international oil prices may remain low for a long period of time.

Chapter III Report of the Board

3. Overall Operation Targets for Business Development and Initiatives of the Group in the Second Half of 2015

Adapting to the global and domestic economic restructuring in the second half of this year, the Group will continue to deepen its industrial restructuring and strategic upgrades, carry out systematic upgrades in terms of development strategies, business models, organisational culture, operational management and other areas, and continue to implement multi-tiered management and refined management so as to establish an “accumulative and continuous improvement mechanism”, laying a new foundation for the sustainable and healthy development of the Group.

In the second half of this year, for mature products like dry containers, reefer containers and special reefers, the Group will give priority to organic growth, continue to focus on internal optimisation, practically exert the scale advantages, and fully implement the cost leadership strategy. Meanwhile, the Group will also put into resources for acquisition growth to continue to explore new business opportunities in terms of new special reefer products, Modular Building, cold chain operations, as well as laser processing technology business.

In the second half of this year, the Group will continue to strive for comprehensively improving the core competencies of global operations: improving the modular core product platform to fully enhance the cross-border design capacity; bringing Made-in-China advantages into full play to increase the transatlantic manufacturing capacity; re-creating the new business development plan of “One Belt and One Road”; building the globally financial service support system. The Group will also develop new businesses: expanding weak markets in China to support the rapid growth of incremental products; deploying new factories in the North American market to expand markets for dry cargo van trucks and maritime skeleton trucks; emphasising the regional market layout in emerging markets following China’s “One Road and One Belt” strategy.

In the second half of this year, the energy equipment business will continue to increase the market share of its core products in the Chinese market to provide one-stop solutions for its customers. Amidst a weak oil price environment, by capturing the business opportunities in LPG trailers and tanks, the Group will expand more overseas businesses opportunities, and will also intensify its effort to develop more engineering, procurement, and construction (EPC) businesses for unconventional natural gas sources. Under the stagnant conditions in the industry, the energy equipment business will consider appropriate acquisition opportunities, to lay a solid foundation for its future development. In respect of the chemical equipment business, the Group will maintain its leading position in terms of the tank container manufacturing industry, optimise product design and production processes, reinforce cost advantages and enhance the research and development of its special and high-end tank containers. In respect of the liquid food business, the Group will continue to increase the brand image of Ziemann Holvrieka and continue to implement the marketing strategy so as to enhance its market position. The Group will also introduce the advanced technologies and knowledge from Europe into its businesses in China to carry out process innovation and improve its existing products.

In the second half of this year, the Group will continue to promote the management topic of “risk prevention, delivery guarantee, cost reduction and structure adjustment” and carry forward the “business plan-based, strong project-based and profit-centric” management routes to proactively cope with changes in the industrial environment with the implementation of the strategies including: developing risk prevention plans to prevent systematic risks; advancing the winter market strategy to ensure the realisation of annual sales and orders targets of delivered projects; insisting on the focus strategy, promoting design fixing, and striving for high-quality orders; strengthening pre-production preparations and enhancing the production efficiency; establishing the guarantee and management support system for resources featuring on-time delivery; achieving breakthrough-based improvement in terms of cost reduction for engineering, procurement, and construction (EPC); ensuring steady financial capital to respond to exchange risks.

Chapter III Report of the Board

the overall business objective is to achieve high-quality growth. Main measures in the second half of this year include: to implement the division management mechanism with unified marketing and management, so as to form an efficient and compliant business platform, and to achieve

Chapter IV Management Discussion and Analysis

The following contents are the financial resource reviews prepared in accordance with the relevant provisions of the Hong Kong Listing Rules. The following discussion and analysis shall be read together with other chapters and the unaudited interim financial statements and notes thereto prepared in accordance with CASBE set out in this Report.

REVENUE AND PROFIT ATTRIBUTABLE TO SHAREHOLDERS OF THE PARENT COMPANY

During the Reporting Period, the Group recorded revenue of RMB32,637.289 million (same period in

Chapter IV Management Discussion and Analysis

BANK LOANS AND OTHER BORROWINGS

As at 30 June 2015, the Group's bank borrowings, debentures payable, other current liabilities (issuance of commercial papers) and other equity instruments in aggregate amounted to RMB39,969.584 million (31 December 2014: RMB33,310.268 million). Details of bank loans and other borrowings of the Group as at 30 June 2015 are set out in notes IV. 23, IV. 34, IV. 35, IV. 36, IV. 37 and IV. 42 of "Chapter VIII Interim Financial Report (Unaudited)" in this Report.

Unit: RMB thousand

	As at 30 June 2015 (unaudited)	As at 31 December 2014 (audited)
Short-term borrowings	16,658,876	11,239,527
Long-term borrowings due within one year	1,061,187	2,052,854
Debentures payable due within one year	3,997,452	2,000,000
Long-term borrowings	12,142,109	11,110,296
Debentures payable	458,520	4,455,080
Other current liabilities (issuance of commercial papers)	3,670,297	2,452,511
Other equity instruments	1,981,143	–
Total	39,969,584	33,310,268

In the first half of 2015, the net bank loans appropriated by the Group amounted to RMB5,008.519 million (same period in 2014: RMB6,624.900 million), a year-on-year decrease of 24.40%.

The Group's bank borrowings are mainly denominated in U.S. dollars, with the interest payments computed using fixed rates and floating rates. As at 30 June 2015, the Group's bank borrowings included fixed-rate borrowings of approximately RMB8,378.690 million (31 December 2014: RMB4,792.023 million), representing an increase of 74.85% as compared with the end of the previous year, which was mainly attributable to the financing arrangement entered into by the Group to meet its requirement for working capital, and floating-rate borrowings of RMB21,483.482 million (31 December 2014: RMB19,608.678 million), representing an increase of 9.56% as compared with the end of the previous year. The long-term borrowings were due within five years. For details, please refer to note XIV. 3 of "Chapter VIII Interim Financial Report (Unaudited)" in this Report.

The Group's issued bonds are mainly denominated in RMB, with the interest payments computed using fixed rates. As at 30 June 2015, the remaining fixed-rate bonds issued by the Group amounted to RMB4,455.972 million (31 December 2014: RMB6,455.080 million). For details, please refer to notes IV. 34 and IV. 37 of "Chapter VIII Interim Financial Report (Unaudited)" in this Report.

On 16 June 2015, the issue of the first tranche of RMB perpetual medium term note for 2015 ("Medium Term Note") of the Group was completed. The Medium Term Note, with a size of RMB2.0 billion and a coupon rate of 5.19% for the preceding three years of interest calculation. The tranche I Medium Term Note shall be redeemed by the issuer at maturity as agreed under the issue terms. The proceeds from the issue of the Medium Term Note will be used for equipment upgrade and project construction of the Company and its subsidiaries and for settlement of bank borrowings of the Company and its subsidiaries. The net amount of RMB1,981.143 million, after deducting issuance costs, was recorded in shareholders' equity under "Other equity instruments".

Chapter IV Management Discussion and Analysis

CAPITAL COMMITMENTS

As at 30 June 2015, the Group had capital commitments of approximately RMB671.010 million (31 December 2014: RMB696.316 million), which were mainly used for manufacturing vessels for sale or rent and performing outward investment contracts. For details, please refer to note XI. 1. (1) of “Chapter VIII Interim Financial Report (Unaudited)” in this Report.

CONTINGENT LIABILITY

As at 30 June 2015, the Group had contingent liabilities of approximately RMB54.656 million (31 December 2014: RMB54.704 million), mainly representing the amount of the compensation for delivery postponement from contracted delivery date to future estimated actual delivery date that CIMC Raffles may need to assume under the vessel construction contracts and vessel leasing contracts entered into by CIMC Raffles and relevant purchasers. For details, please refer to note X. 1 of “Chapter VIII Interim Financial Report (Unaudited)” in this Report.

SIGNIFICANT INVESTMENTS AND MAJOR ACQUISITIONS AND SALES RELATING TO SUBSIDIARIES AND ASSOCIATED COMPANIES

During the Reporting Period, the Group completed the acquisition of respective 50% shares of Sino-Worlink (Beijing) Investment Co., Ltd. and Sino-Worlink (Hong Kong) International Logistics Co., Ltd., at a total consideration of RMB105 million. For details, please refer to “4. Analysis of Investments during the Reporting Period” of “III. Financial Discussion and Analysis Disclosed According to the Requirements of Domestic Securities Regulatory Authorities” under “Chapter III Report of the Board”.

FUTURE PLANS FOR SIGNIFICANT INVESTMENTS AND EXPECTED SOURCE OF FUNDING

The operating and capital expenditures of the Group are mainly financed by our own fund and external financing. The Group will take a prudent attitude to enhance its operating cash flow. The Group has sufficient resources of funding to meet the requirements of capital expenditure and working capital during the year.

CAPITAL EXPENDITURE AND FINANCING PLAN

Based on changes in the economic situation and operating environment, as well as the requirements of the Group’s strategic upgrade and business development, the capital expenditure of the Group in 2015 was approximately RMB6,000 million, among which approximately RMB3,584 million was actually expensed in the first half of this year, which was mainly used for purchase and construction of fixed assets, intangible assets and other long-term assets. Various forms of financing arrangements will be considered in the second half of this year.

The Company entered into subscription agreements with COSCO Container Industries Limited, Broad Ride Limited and Promotor Holdings Limited pursuant to a general mandate on 23 December 2013 and entered into amendment agreements on 23 June 2014 and 26 March 2015 for equity financing through proposed issue of additional H shares. The Company received the Approval of the Issue of Additional Overseas Listed Foreign Shares by China International Marine Containers (Group) Co., Ltd. (Zheng Jian Xu Ke [2015] No. 1749) (《關於核准中國國際海運集裝箱(集團)股份有限公司增發境外上市外資股的批復》(證監許可[2015]1749號)) from China Securities Regulatory Commission on 22 July 2015 pursuant to which, the China Securities Regulatory Commission approved the Company to issue up to 286,096,100 additional overseas listed foreign shares. The total proceeds from the issue of such new H shares were estimated to be approximately HK\$3.857 billion, which would be used for the Group’s working capital. As of the end of the Reporting Period, the issue of such additional H shares has not yet been completed.

Chapter IV Management Discussion and Analysis

EMPLOYEES, TRAINING AND DEVELOPMENT

As at 30 June 2015, the Group had 61,723 employees in total (same period in 2014: 61,074). The total staff cost during the Reporting Period, including Directors' remuneration, contribution to the retirement benefit schemes and share option schemes, amounted to RMB2,515.447 million (same period in 2014: RMB2,606.387 million).

The Group provides salary and bonus payment to its employees based on their performance, qualification, experience and market conditions. The share option scheme aims to recognise the previous contribution of Directors and core employees to the Group and reward them for their long-term services. For details of the A Share(s) Share Option Incentive Scheme adopted by the Company, please refer to "VII. Implementation and Effect of the Company's Share Option Incentive Scheme" under "Chapter V Significant Events" in this Report. Other benefits include contribution to the governmental pension schemes and insurance plans for employees in mainland China. The Group regularly reviews its remuneration policies, including Directors' remuneration payable, and strives to formulate an improved incentive and assessment mechanism based on the operating results of the Group and market conditions.

SHARE CAPITAL

As at 30 June 2015, the Company's share capital is as follows:

		(RMB million)	(%)
A Shares	RMB1.00	1,256,604,507	46.76%
H Shares	RMB1.00	1,430,480,509	53.24%
Total		2,687,085,016	100.00%

EVENTS AFTER THE BALANCE SHEET DATE

For details about the events after the balance sheet date of the Reporting Period, please refer to note XII of "Chapter VIII Interim Financial Report (Unaudited)" in this Report.

DISCLOSURE UNDER THE HONG KONG LISTING RULES

In accordance with paragraph 40 of Appendix 16 of the Hong Kong Listing Rules, the Company confirms that, save as disclosed herein, there has been no material change in the current information regarding the Company from the information disclosed in the 2014 annual report of the Company.

Chapter V Significant Events

I. CORPORATE GOVERNANCE

During the Reporting Period, the Group continued to promote governance in compliance with laws and constantly improved corporate governance and maintained normal operation strictly in accordance with the relevant provisions of the state and the regulations and documents issued by regulatory authorities including the China Securities Regulatory Commission, CSRC Shenzhen Bureau, Shenzhen Stock Exchange, SFC and Hong Kong Stock Exchange.

In the first half of 2015, the Group continued to realise the full coverage of its internal control system, and completed the construction of internal control systems for 12 newly joined enterprises including Zhenhua Logistics and Ziegler. The Group continued to thoroughly propel the four key tasks in respect of internal controls: first, to construct the internal controls compliance programme. It has completed the onsite audit on 8 enterprises; second, to finalise the plan for preparation of an internal control manual for 2015. It has fully commenced the preparation of internal control manuals for 9 enterprises; third, to develop internal control personnel, select candidates of supervisors for internal controls and provide them with further trainings and improve the Measures for Assessment of Internal Control Personnel; fourth, to advance the optimisation of the internal control information system. During the Reporting Period, by enriching its risk control for its strategic planning, management mechanism formulating and significant event planning, the Group has provided trainings in respect of internal controls and anti-fraud measures to its members in the fields of containers, vehicles, logistics, real estate and etc. In addition, by joining hands with well-known domestic enterprises including Alibaba, Vanke and Fosun, the Group set up the first anti-fraud alliance within enterprises in China, which has facilitated the communication and cooperation for anti-fraud tasks, initiated compliance management and performed its social responsibilities. Meanwhile, the Group also participated in the research activities concerning preparation of the ISO International Anti-bribery Standard, and carried out investigation and survey within its members. In the first half of this year, the Group was awarded the “Five-star Enterprise for Social Responsibilities (社會責任五星級企業)” and the Golden Prize for Quality Prize of Shenzhen Mayor (深圳市長質量獎金獎), for which the system of the internal audit of internal controls played an important role and provided professional opinions and services in relation to the risk controls for the development of the Group.

II. CORPORATE GOVERNANCE

1. Compliance with the Principles and Code Provisions under the Corporate Governance Code by the Company during the Reporting Period

The Board is committed to raising the standard of corporate governance within the Group and believes that good corporate governance helps the Group to safeguard the interests of the Shareholders and improve its business performance. The Company has complied with the code provisions under the Corporate Governance Code set out in Appendix 14 of the Hong Kong Listing Rules during the Reporting Period, except for slight deviation from the code provisions A.2.7. Deviations from relevant code provisions as set out in 2014 annual report of the Company have been partly improved. Deviations and their improvements have been disclosed in relevant paragraphs below.

(1) The Board and its operation

During the Reporting Period, 10 meetings of the Board were held by the seventh session of the Board of the Company, of which 2 meetings were held on-site, 8 meetings were held in a way of written review resolutions with 44 resolutions reviewed. Of the 10 Board meetings above, 2 were regular meetings and 8 were interim meetings. Save for regular meetings, in the course of the management and supervision of the Group's business operations, the Company's executive Directors have brought major business or management matters to the attention of the Board to hold an interim Board meeting from time to time, and relevant Board decisions were made in the form of written resolutions by all Directors. 11 meetings were held by each special Board committee with 16 letters of opinions from Board committees passed.

(2) Operation of the Supervisory Committee

During the Reporting Period, 3 meetings of the seventh session of the Supervisory Committee of the Company were held with 7 resolutions reviewed and 1 event considered. The Supervisors were in attendance at 10 meetings of the Board on a non-voting basis and attended 2 Shareholders' general meetings.

Chapter V Significant Events

(3) Shareholders' general meeting

During the Reporting Period, 2 general meetings were held by the Company, including the 2015 first extraordinary general meeting held in Shenzhen on 3 March 2015 ("2015 First Extraordinary General Meeting") and the 2014 annual general meeting held in Shenzhen on 8 June 2015 ("2014 Annual General Meeting"). The notice, convening, holding and voting procedures were in compliance with the relevant requirements of the PRC Company Law, the Articles of Association and the Hong Kong Listing Rules. The announcements on the related resolutions of the meetings were published in China Securities Journal, Shanghai Securities News and Securities Times and on Cninfo website (<http://www.cninfo.com.cn>) on 4 March 2015 and 9 June 2015, and on the websites of the Hong Kong Stock Exchange (<http://www.hkexnews.hk>) and the Company (<http://www.cimc.com>) on 3 March 2015 and 8 June 2015.

The Company's non-executive Director Mr. Wang Hong attended the 2015 First Extraordinary General Meeting. Non-executive Directors Mr. Li Jianhong, Mr. Zhang Liang and Mr. Wu Shuxiong, executive Director Mr. Mai Boliang and independent non-executive Directors Mr. Li Kejun, Mr. Pan Chengwei and Mr. Wong Kwai Huen failed to attend this general meeting due to other important affairs.

The Company's Directors (except non-executive Director Mr. Wang Hong) all attended the 2014 Annual General Meeting. Non-executive Director Mr. Wang Hong failed to attend this general meeting due to other important affairs.

(4) Updates regarding to deviations from code provisions as set out in 2014 annual report of the Group

The code provision A.2.7 requires that "The chairman shall convene at least one meeting every year with the non-executive Directors (including independent non-executive Directors) without the executive Directors present". The Company has only one executive Director Mr. Mai Boliang and the Company's business operation is managed and monitored by the executive Director. The Directors consider that during the Reporting Period there is no meeting in which the executive Director shall not take part. Therefore, during the Reporting Period, the Company has not held a Board meeting without the executive Director present.

2. Compliance with the Model Code by Directors and Supervisors of the Company for Securities Transactions

The Company has adopted the standards prescribed in the Model Code contained in Appendix 10 of the Hong Kong Listing Rules as the code of conduct in dealing in securities of the Company by Directors and Supervisors. After inquiries to all the Directors and Supervisors, all the Directors and Supervisors confirmed that they had complied with the requirements in the Model Code during the Reporting Period.

3. Audit Committee

The Company has appointed three independent non-executive Directors and established the audit committee pursuant to the requirements of the Hong Kong Listing Rules. At the end of the Reporting Period, the members of the audit committee under the Board consisted of Mr. Pan Chengwei (chairman of the audit committee with professional qualifications and experience in relation to financial management such as accounting), Mr. Li Kejun and Mr. Wong Kwai Huen, Albert. On 26 August 2015, the audit committee reviewed the interim financial report of the Group for the six months ended 30 June 2015, and agreed to present the same to the Board.

4. Disclosure Pursuant to Rule 13.51B(1) of the Hong Kong Listing Rules

For the changes in information of Directors, Supervisors and chief executive officer of the Company to be disclosed pursuant to Rule 13.51B(1) of the Hong Kong Listing Rules during the Reporting Period, please refer to the chapter headed "IV. Changes in Information of Directors and Supervisors" under "Chapter VII Information on Directors, Supervisors and Senior Management". Except for such disclosure, there is no other information required to be disclosed pursuant to Rule 13.51B(1) of the Hong Kong Listing Rules.

III. LITIGATIONS

Material litigation and arbitration events

Description of the litigation or arbitration event	Amount involved (US\$ million)	Whether the event is a contingent liability	Description of the event	Status of the event	Date of occurrence	Reference
The deepwater semi-submersible drilling platforms SSPantanal and SSAmazonia constructed by CIMC Raffles and its subsidiaries for subsidiaries of Brazil Schahin Holding S.A. were delivered in November 2010 and April 2011, respectively. CIMC Raffles and its subsidiaries also offered advance payments for the construction of such drilling platforms for Schahin Holding S.A. and its six affiliates.	1,300,000	No	The deepwater semi-submersible drilling platforms SSPantanal and SSAmazonia constructed by CIMC Raffles and its subsidiaries for subsidiaries of Brazil Schahin Holding S.A. were delivered in November 2010 and April 2011, respectively. But, the gross proceeds from sales of US\$142.3 million were failed to be recovered; at the same time, CIMC Raffles also offered advance payments for the construction of such drilling platforms for Schahin Holding S.A. and its six affiliates, with the total amount of US\$66.13 million also not recovered.	As of the end of the Reporting Period, the above litigation and arbitration have been settled. The settlement of the litigation and arbitration against Schahin and the recovery of the above arrears are expected to have a positive impact on the financial position of the Company under the current year.	Concluded 2015-3-6 2015-3-7	http://www.hkexnews.hk http://www.cninfo.com.cn
			As Schahin Holding S.A. and its six affiliates failed to pay the above funds according to the contract, CIMC Raffles and its subsidiaries filed a lawsuit and arbitration application for the gross proceeds from sales and advance payments against Schahin Holding S.A. and its six affiliates in December 2011 and May 2012, respectively. According to the pre-arbitration rules, CIMC Raffles has recovered a part of account receivables. As at 31 December 2013, all the advances had been recovered, while an account receivable of US\$126.32 million (equivalent to approximately RMB770 million) was to be collected. During 2014, CIMC Raffles recovered an account receivable of US\$105.54 million (including the principal of US\$77.60 million and interest of US\$27.94 million). As at 31 December 2014, there were account receivables of US\$48.72 million to be recovered.			

Chapter V Significant Events

In February 2015, CIMC Raffles reached a comprehensive reconciliation and signed a settlement agreement with Schahin Holding S.A. and its affiliates for the unsettled litigation and arbitration. As

VII. IMPLEMENTATION AND EFFECT OF THE COMPANY'S SHARE OPTION INCENTIVE SCHEME

1. Summary of Share Option Incentive Scheme

(1) Share option scheme of the Company

In order to establish and improve the incentive-constraint mechanism, and effectively combine the interests of the Shareholders, the interests of the Company and the personal interests of individuals, an A Share(s) Share Option Incentive Scheme was considered and approved at the extraordinary general meeting of the Company on 17 September 2010. According to such scheme, the first tranche of 54,000,000 share options (the "First Tranche of Share Options") were registered on 26 January 2011 and the reservation of 6,000,000 share options (the "Second Tranche of Share Options") were registered on 17 November 2011. The options of the first exercisable period for the First Tranche of Share Options were exercisable starting from 14 January 2014 to 26 September 2014 with the total exercisable options during the Reporting Period amounting to 13,357,500 options, among which 10,232,500 options have been actually exercised and 3,125,000 unexercised options overdue have been cancelled. Please refer to the relevant announcements released on the websites of the Shenzhen Stock Exchange, the Hong Kong Stock Exchange and the Company as well as relevant regular reports of the Company in recent years.

Upon the consideration and approval at the eighth meeting of the seventh session of the Board in 2015, the options of the second exercisable period for the First Tranche of Share Options and the first exercisable period for the Second Tranche of Share Options have met the exercise conditions and the options were exercisable starting from 2 June 2015. The second exercisable period for the First Tranche of Share Options was actually exercisable starting from 2 June 2015 to 28 September 2020 with the total exercisable options amounting to 39,660,000 options. The first exercisable period for the Second Tranche of Share Options was actually exercisable starting from 2 June 2015 to 21 September 2015 with the total exercisable options amounting to 1,392,500 options. Please refer to the relevant announcements released on the websites of the Shenzhen Stock Exchange, the Hong Kong Stock Exchange and the Company as well as relevant regular reports of the Company in recent years.

During the Reporting Period, 13,812,510 options were exercised during the second exercisable period for the First Tranche of Share Options, and 643,955 options were exercised during the first exercisable period for the Second Tranche of Share Option, representing 26.03% of the total of share options incentive scheme (adjusted).

Chapter V Significant Events

(2) Share option incentive scheme of the subsidiary CIMC Enric

CIMC Enric adopted a share option scheme according to the ordinary resolution passed at its extraordinary general meeting held on 12 July 2006, aiming to reward and give benefit to employees, directors and other eligible persons of CIMC Enric for their contributions to CIMC Enric. According to the scheme, on 11 November 2009, CIMC Enric granted share options to several eligible persons in order to subscribe its 43,750,000 ordinary shares in total (“2009 Enric Share Options”); on 28 October 2011, it granted share options to several eligible persons in order to subscribe its 38,200,000 ordinary shares in total (“2011 Enric Share Options”); on 5 June 2014, it granted share options to several eligible persons in order to subscribe its 38,420,000 ordinary shares in total (“2014 Enric Share Options”). Please refer to the related announcement of CIMC Enric published on the website of the Hong Kong Stock Exchange, the relevant announcements released on the websites of the Shenzhen Stock Exchange, the Hong Kong Stock Exchange and the Company as well as relevant regular reports of the Company in recent years.

Up to 30 June 2015, 3,440,000 share options of the 2009 Enric Share Options, 2,890,000 share options of the 2011 Enric Share Options and no share option of the 2014 Enric Share Options were lapsed respectively.

(3) Implementation of the equity trust scheme of CIMC Vehicle

An equity trust scheme of the Company’s wholly-owned subsidiary CIMC Vehicle (Group) Co., Ltd. was considered and approved at the general meeting of the Company on 17 October 2007 for implementation. Pursuant to the scheme, the senior management relating to the vehicle business of the Company and the key employees of CIMC Vehicle (Group) Co., Ltd. held 20% equity interests in CIMC Vehicle (Group) Co., Ltd. by capital increase of RMB220,700,000 through Shenzhen International Trust & Investment Co., Ltd. (深圳國際信託投資有限責任公司) (the “Vehicle Equity Trust Scheme”). Please refer to the relevant announcements released on the websites of the Shenzhen Stock Exchange, the Hong Kong Stock Exchange and the Company as well as relevant regular reports of the Company in recent years. As at 30 June 2015, the Vehicle Equity Trust Scheme had distributed 217,570,000 share options, representing 98.58% of the total trust scheme.

Chapter V Significant Events

2. Implementation of the A Share(s) Share Option Incentive Scheme of the Company and its Influence

Scope of participants during the Reporting Period	The first tranche of 54,000,000 shares (among which 4,032,500 shares were cancelled) granted to 175 senior management and key technical personnel of the Company; the second tranche of 6,000,000 share options (among which 430,000 shares were cancelled) granted to 40 key technical personnel and middle-level management.
Total equity granted during the Reporting Period (shares)	0
Total equity exercised during the Reporting Period (shares)	14,456,465
Total equity cancelled during the Reporting Period (shares)	955,000

Chapter VI Changes in Share Capital and Information on Substantial Shareholders

III. DISCLOSURE OF SHAREHOLDINGS OF THE SUBSTANTIAL SHAREHOLDERS AND OTHER PERSONS UNDER THE SECURITIES AND FUTURES ORDINANCE OF HONG KONG

As far as the Directors were aware, as at 30 June 2015, the persons (other than a Director, a Supervisor or the chief executive of the Company) who had interests or short positions in the shares and underlying shares of the Company which are required to be recorded in the register of interests in shares and short positions required to be kept by the Company pursuant to Section 336 of the SFO are as follows:

The table content is redacted with a large black box. Only the following text is visible at the bottom of the box:

	()	(%)	(%)
--	-----	-----	-----

Chapter VI Changes in Share Capital and Information on Substantial Shareholders

3. Substantial Shareholders

The substantial Shareholders of the Company are CM Group and COSCO. CM Group was incorporated on 14 October 1986 in the PRC with limited liability. Its registered capital is RMB10,050 million and its chairman of the board of directors is LI Jianhong. CM Group's three core business sectors focus on the construction, operation and service in respect of transportation and related infrastructure (ports, toll roads, energy transportation and logistics), financial investment and management, property development and management. COSCO was incorporated on 27 April 1961 in the PRC with limited liability. Its registered capital is RMB4,103.367 million and its chairman of the board of directors is MA Zehua. COSCO is an international company with businesses covering marine transportation, logistics terminals, ship building and repairing.

Except for the abovementioned CM Group and COSCO, no other legal person or individual holds 10% or more of the total issued share capital of the Company (excluding HKSCC Nominees Limited).

4. Shareholding Relationships between the Company and the Substantial Shareholders as at 30 June 2015

Chapter VI Changes in Share Capital and Information on Substantial Shareholders

V. SHARE PURCHASING PLAN PROPOSED OR IMPLEMENTED BY SHAREHOLDERS OR PERSONS ACTING IN CONCERT WITH THEM DURING THE REPORTING PERIOD

Applicable Not applicable

COSCO Container Industries Limited	65,099,638	H Shares	4.55%	0	0	25 December 2013	-
Broad Ride Limited	77,948,412	H Shares	5.45%	0	0	25 December 2013	-

Explanations on other situations:

The Company received the Approval of the Issue of Additional Overseas Listed Foreign Shares by China International Marine Containers (Group) Co., Ltd. (Zheng Jian Xu Ke [2015] No. 1749) (《關於核准中國國際海運集裝箱集團股份有限公司增發境外上市外資股的批復》(證監許可[2015]1749號)) from China Securities Regulatory Commission on 22 July 2015 pursuant to which, the China Securities Regulatory Commission approved the Company to issue up to 286,096,100 additional overseas listed foreign shares. The total proceeds from the issue of such new H shares were estimated to be approximately HK\$3.857 billion, which would be used as the Group's working capital. As of the end of the Reporting Period, the issue of such additional H shares has not yet been completed.

VI. REPURCHASE, SALE OR REDEMPTION OF SECURITIES

The Company or any of its subsidiaries did not repurchase, sell or redeem any of the listed securities of the Company or any of its subsidiaries during the Reporting Period.

VII. SUFFICIENCY OF PUBLIC FLOAT

Based on the public information available to the Company and as far as the Board of the Company were aware, the Directors confirm that, the minimum public float of the Company as at the date of this Report has satisfied the requirements of the Hong Kong Listing Rules.

VIII. RELEVANT INFORMATION ABOUT PREFERRED SHARES

Applicable Not applicable

The Company has never issued any preferred shares.

Chapter VII Information on Directors, Supervisors and Senior Management

I. CHANGES ON SHAREHOLDINGS OF DIRECTORS, SUPERVISORS AND SENIOR MANAGEMENT

✓ Applicable Not applicable

Name	Position	Change Type	Current	Change	Change	Change	Change	Change	Change
Zeng Beihua	General Manager of Capital Management Department	Current	250,000	0	62,500	187,500	Nil	Nil	Nil

II. INTERESTS OF DIRECTORS, SUPERVISORS AND THE CHIEF EXECUTIVE IN THE SHARES OF THE COMPANY AND ASSOCIATED CORPORATION THEREOF

As at 30 June 2015, the interests and short positions held by the Directors, Supervisors and the chief executive of the Company in any shares, underlying shares or debentures of the Company or any of its associated corporations (within the meaning of Part XV of the SFO) pursuant to Part XV of the SFO which are required to be notified to the Company and the Hong Kong Stock Exchange under Divisions 7 and 8 of Part XV of the SFO, including interests and short positions which the Directors or Supervisors are taken or deemed to have under such provisions of the SFO, or which are required to be recorded in the register required to be kept by the Company under Section 352 of the SFO, or otherwise required to be notified by the Directors, Supervisors and the chief executive to the Company and the Hong Kong Stock Exchange under the Model Code contained in Appendix 10 of the Hong Kong Listing Rules, were as follows:

1. Interest in the Shares of the Company:

Name	Position	Capacity	Class of Shares	Number of Shares	Number of Shares	Number of Shares	Position	Percentage	Percentage
Mai Boliang	Executive Director, President	Beneficial owner	A Shares	494,702	494,702	–	Long position	0.04%	0.02%

I. GENERAL INFORMATION

China International Marine Containers (Group) Co., Ltd. (the "Company"), formerly "China International Marine Containers Co., Ltd.", was a Sino-foreign joint venture set up by China Merchants Group, the East Asiatic Company (Denmark) and Ocean Containers Inc. (USA). In December 1992, as approved by "Shen Fu Ban Fu [1992] 1736" issued by the General Office of the People's Government of Shenzhen and "Shen Ren Yin Fu Zi (1992) 261" issued by Shenzhen Special Economic Zone Branch of People's Bank of China, the Company was restructured as an incorporated company set up by directional subscription and was renamed as "China International Marine Containers Co., Ltd." by the original corporate shareholders of the Company. On 31 December 1993 and 17 January 1994 respectively, the Company issued ordinary shares denominated in Renminbi for domestic investors (A Shares) and for foreign shares issued domestically (B Shares), and commenced trading on Shenzhen Stock Exchange. Pursuant to "Shen Fu Ban Fu [1993] 925" issued by the General Office of the People's Government of Shenzhen and "Shen Zheng Ban Fu [1994] 22" issued by Shenzhen Securities Administration Office on 1 December 1995, as approved by the State Administration of Industry and Commerce, the Company changed its name to "China International Marine Containers (Group) Co., Ltd". The Registered Address and Address of Head Office of the Company is 8th Floor, CIMC R&D Centre, 2 Gangwan Avenue, Shekou, Nanshan District, Shenzhen, Guangdong, PRC.

As at 19 December 2012, the Company's domestically listed foreign shares (B shares) changed listing location and went publication on the main market of the Stock Exchange of Hong Kong through the way of introduction. Henceforth, all the company's B shares converted to overseas listed foreign shares (H shares). After conversion, the share capital of the Company amounted to 2,662,396,051 shares. Please refer to Note IV.41 for details of the share capital.

The principal activities of the Company and its subsidiaries (together referred to as the "Group") are the manufacturing of modern transportation facilities, facilities for energy, food, chemistry and rendering of relative services. Detailed activities are the manufacturing and repairing of containers and other relevant business; utilizing the Group's equipment to process and manufacture various parts, structure components and relevant machines; providing cutting, punching, moulding, riveting surface treatment (including sand/paint spraying, welding and assembly) and other processing services; developing, manufacturing and selling of various high-tech and high performance special vehicles and semi-trailers; leasing of containers; developing, production and sales of high-end fuel gas equipments such as pressure container and compressor; providing integrated services for natural gas distribution; production of static container and pot-type wharf equipments and providing EP+CS (engineering procurement and construction supervision) technical service for the storage and processing of LNG, LPG and other petrochemical gases. Apart from the above, the Group is also engaged in manufacturing of logistic equipment and related services, marine projects, airport equipment production and property development, etc.

I. GENERAL INFORMATION (CONTINUED)

Please refer to Note V for details of subsidiaries included in the scope of consolidation and also refer to Note V.1 for the details of subsidiaries newly included in the scope of consolidation. There was no subsidiary that was excluded from the scope of consolidation for the current period.

These financial statements have been approved for issue by the Company's Board of Directors on 27 August 2015.

II. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES

The Group makes specific accounting policies and accounting estimates according to characteristics of its business operations, which include provision of bad debt of receivables (Note II.10), the cost of inventories (Note II.11), the criteria for determining impairment of non-current assets (Note II.20), depreciation policy of investment properties, fixed assets and amortisation policy of intangible assets (Note II.13, 14 and 17), measurement of provisions (Note II.21) and revenue recognition (Note II.23)...etc.

Key judgments applied for critical accounting policies by the Group are disclosed in Note II.33.

1. Basis of preparation

The financial statements were prepared in accordance with the Basic Standard and specific standards of the Accounting Standards for Business Enterprises issued by the Ministry of Finance on 15 February 2006, and the specific accounting standards and the relevant regulations issued thereafter (hereafter collectively referred to as "Chinese Accounting Standards" or "CAS") and the disclosure requirements in the Preparation Convention of Information Disclosure by Companies Offering Securities to the Public No.15 – General Rules on Financial Reporting issued by the China Securities Regulatory Commission.

The financial statements are prepared on a going concern basis.

2. Statement of compliance with the Accounting Standards for Business Enterprises

The financial statements of the Company for the period ended 30 June 2015 are in compliance with the Accounting Standards for Business Enterprises, and truly and completely present the financial position of the Consolidated and the Company as of 30 June 2015 and of their financial performance, cash flows and other information for the period then ended.

3. Accounting year

The Company's accounting year starts on 1 January and ends on 31 December.

Notes to the Financial Statements

For the period from 1 January 2015 to 30 June 2015

(All amounts in RMB'000 unless otherwise stated)

English Translation for Reference Only

II. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

4. Recording currency

Functional currency is determined by the Company and its subsidiaries on the basis of the currency in which major income and costs are denominated and settled.

The functional currency of the Company and its subsidiaries domiciled in PRC are Renminbi. Hong Kong and the overseas subsidiaries use local currencies as their functional currencies. Foreign currencies are defined as currency other than functional currency.

Financial statements of the Company are presented in Renminbi. For subsidiaries using currencies other than Renminbi as their functional currencies, the Company translates the financial statements of these subsidiaries into Renminbi (see Note II.8).

5. Business combinations

(1) Business combinations involving enterprises under common control

A business combination involving enterprises under common control is a business combination in which all of the combining enterprises are ultimately controlled by the same party or parties both before and after the business combination, and that control is not transitory. The assets and liabilities obtained are measured at the carrying amounts as recorded by the enterprise being combined at the combination date. The difference between the carrying amount of the net assets obtained and the carrying amount of consideration paid for the combination (or the total face value of shares issued) is adjusted to capital premium in the capital reserve. If the balance of the capital premium is insufficient, any excess is adjusted to retained earnings. Any costs directly attributable to the combination shall be recognised in profit or loss for the current period when occurred. The combination date is the date on which one combining enterprise effectively obtains control of the other combining enterprises.

(2) Business combinations involving enterprises not under common control

A business combination involving enterprises not under common control is a business combination in which all of the combining enterprises are not ultimately controlled by the same party or parties both before and after the business combination. Where 1) the aggregate of the fair value at the acquisition date of assets transferred (including the acquirer's previously held equity interest in the acquiree), liabilities incurred or assumed, and equity securities issued by the acquirer, in exchange for control of the acquiree, exceeds 2) the acquirer's interest in the fair value at the acquisition date of the acquiree's identifiable net assets, the difference is recognised as goodwill (see Note II.18). Where 1) is less than 2), the difference is recognised in profit or loss for the current period. The costs of the issuance of equity or debt securities as a part of the consideration paid for the acquisition are included as a part of initial recognition amount of the equity or debt securities. Other acquisition-related costs arising from the business combination are recognised as expenses in the periods in which the costs are incurred. The difference between the fair value and the carrying amount of the assets transferred is recognised in profit or loss. The acquiree's identifiable asset, liabilities and contingent liabilities, if satisfying the recognition criteria, are recognised by the Group at their fair value at the acquisition date. The acquisition date is the date on which the acquirer effectively obtains control of the acquiree.

Notes to the Financial Statements

For the period from 1 January 2015 to 30 June 2015

(All amounts in RMB'000 unless otherwise stated)

English Translation for Reference Only

II. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

6. Preparation of consolidated financial statements

The scope of consolidated financial statements is based on control and the consolidated financial statements comprise the Company and its subsidiaries. Control means the group has rights in the invested entity, and could gain returns through its involvement with the entity as well as has the ability to affect those returns through its power over the entity. The financial position, financial performance and cash flows of subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases.

Where a subsidiary was acquired during the reporting period, through a business combination involving enterprises under common control, the financial statements of the subsidiary are included in the consolidated financial statements as if the combination had occurred at the date that the ultimate controlling party first obtained control. The opening balances and the comparative figures of the consolidated financial statements are also restated. In the preparation of the consolidated financial statements, the subsidiary's assets and liabilities based on their carrying amounts are included in the consolidated balance sheet, and financial performance is included in the consolidated income statement, respectively, from the date that the ultimate parent company of the Company obtains the control of the subsidiary to be consolidated.

Where a subsidiary was acquired during the reporting period, through a business combination involving enterprises not under common control, in the preparation of the consolidated financial statements, the identifiable assets and liabilities of the acquired subsidiaries are included in the scope of consolidation from the date that control commences, base on the fair value of those identifiable assets and liabilities at the acquisition date.

For a business combination not involving enterprises under common control and achieved in stages, the Group remeasures its previously-held equity interest in the acquiree to its fair value at the acquisition date. The

Notes to the Financial Statements

For the period from 1 January 2015 to 30 June 2015

(All amounts in RMB'000 unless otherwise stated)

English Translation for Reference Only

II. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

6. Preparation of consolidated financial statements (Continued)

Owners' equity of subsidiaries, profit or loss and comprehensive income not attributable to the Company are recorded as minority interests, profit or loss attributable to minority shareholders and comprehensive income attributable to minority shareholders, respectively, and are presented separately within the items of owners' equity, net profit and total comprehensive income in the consolidated financial statements.

When the amount of loss for the current period attributable to the minority shareholders of a subsidiary exceeds the minority shareholders' portion of the opening balance of shareholders' equity of the subsidiary, the excess is allocated against the minority interests.

When the accounting period or accounting policies of a subsidiary are different from those of the Company, the Company makes necessary adjustments to the financial statements of the subsidiary based on the Company's own accounting period or accounting policies.

All significant inter-group balances, transactions and unrealised profits are eliminated in the consolidated financial statements. The portion of a subsidiary's equity and the portion of a subsidiary's net profit and losses for the period as well as comprehensive income not attributable to Company are recognised as minority interests, net profit and losses attributable to minority interests as well as and comprehensive income attributable to minority interests presented separately in the consolidated financial statements within equity and net profit as well as total comprehensive income respectively. The unrealised profit and losses arising from sales of assets to subsidiaries by the Company are fully eliminated against net profit attributable to owners of the Company. The unrealised profit and losses arising from sales of assets to the Company by subsidiaries are eliminated against net profit attributable to owners of the Company as well as net profit attributable to minority interests respectively according to the Company and minority interests' shareholding on the subsidiaries. The unrealised profit and losses arising from sales of between subsidiaries are eliminated against net profit attributable to owners of the Company as well as net profit attributable to minority interests respectively according to the Company and minority interests' share holdings on the subsidiary who sold.

The difference on recognising a same transaction between on the accounting subjects of the Group and of the Company or its subsidiaries would be adjusted on the accounting subject of the Group.

7. Cash and cash equivalents

Cash and cash equivalents comprise cash on hand, deposits that can be readily drawn on demand, and short-term and highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

Notes to the Financial Statements

For the period from 1 January 2015 to 30 June 2015

(All amounts in RMB'000 unless otherwise stated)

English Translation for Reference Only

II. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

8. Foreign currency transactions and translation of financial statements denominated in foreign currency

When the Group receives capital in foreign currencies from investors, the capital is translated to functional currency at the spot exchange rate at the date of the receipt. Other foreign currency transactions are, on initial recognition, translated to functional currency at the rates that approximate the spot exchange rates at the dates of the transactions.

A spot exchange rate is an exchange rate quoted by the People's Bank of China. A rate that approximates the spot exchange rate is a rate determined under a systematic and rational method, normally the average exchange rate of the current period or the weighted average exchange rate.

Monetary items denominated in foreign currencies are translated to functional currency at the spot exchange rate at the balance sheet date. The resulting exchange differences, except for those arising from the principal and interest of specific foreign currency borrowings for the purpose of acquisition, construction or production of qualifying assets (see Note II.16), are recognised in profit or loss. Non-monetary items denominated in foreign currencies that are measured at historical cost are translated to functional currency using the foreign exchange rate at the transaction date. Non-monetary items denominated in foreign currencies that are measured at fair value are translated using the foreign exchange rate at the date the fair value is determined; the resulting exchange differences are recognised in profit or loss, except for the differences arising from the translation of available-for-sale financial assets, which are recognised as other comprehensive income in capital reserve. The effect of exchange rate changes on cash presented separately in the cash flow statement.

The assets and liabilities of foreign operation are translated to functional currency at the spot exchange rates at the balance sheet date. The equity items, excluding "Retained earnings", are translated to functional currency at the spot exchange rates at the transaction dates. The income and expenses of foreign operation are translated to functional currency at the rates that approximate the spot exchange rates at the transaction dates. The resulting translation differences are recognised in a separate component of equity. Upon disposal of a foreign operation, the cumulative amount of the translation differences recognised in equity which relates to that foreign operation is transferred to profit or loss in the period in which the disposal occurs. The cash flows of overseas operations are translated at the spot exchange rates on the dates of the cash flows. The effect of exchange rate changes on cash presented separately in the cash flow statement.

Notes to the Financial Statements

For the period from 1 January 2015 to 30 June 2015

(All amounts in RMB'000 unless otherwise stated)

II. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

9. Financial instruments

Financial instruments include cash at bank and on hand, financial assets at fair value through profit or loss, receivables, available-for-sale financial assets, investments in equity securities other than long-term equity investments (see Note II.12), payables, loans, borrowings and Debentures payables.

(1) Financial Assets

(a) *Classification of financial assets*

Financial assets are classified into the following categories at initial recognition: financial assets at fair value through profit or loss, receivables, available-for-sale financial assets and held-to-maturity investments. The classification of financial assets depends on the Group's intention and ability to hold the financial assets.

a. Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss include financial assets held for the purpose of selling in short term.

b. Receivables

Receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market.

c. Available-for-sale financial assets

Available-for-sale financial assets are non-derivatives that are either designated in this category or not classified in any of the other categories. They are included in non-current assets unless the investment matures or management intends to dispose of it within 12 months of the end of the reporting period.

(b) *Recognition and measurement*

Financial assets are recognised at fair value on the balance sheet when the Group becomes a party to the contractual provisions of the financial instrument. In the case of financial assets at fair value through profit or loss, the related transaction costs incurred at the time of acquisition are recognised in profit or loss for the current period. For other financial assets, transaction costs that are attributable to the acquisition of the financial assets are included in their initial recognition amounts.

Financial assets at fair value through profit or loss are subsequently measured at fair value. Investments in equity instruments are measured at cost when they do not have a quoted market price in an active market and whose fair value cannot be reliably measured. Receivables are measured at amortised cost using the effective interest method.

Notes to the Financial Statements

For the period from 1 January 2015 to 30 June 2015

(All amounts in RMB'000 unless otherwise stated)

English Translation for Reference Only

II. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

9. Financial instruments (Continued)

(1) Financial Assets (Continued)

(b) Recognition and measurement (Continued)

Gain or loss arising from change in the fair value of financial assets at fair value through profit or loss is recognised in profit or loss. Interests and cash dividends received during the period in which such financial assets are held, as well as the gains or losses arising from disposal of these assets are recognised in profit or loss for the current period.

Accumulated fair value adjustments of available-for-sale financial assets are recognised in equity except impairment and exchange gains and losses of foreign currency financial assets. When available-for-sale financial assets are disrecognised, the accumulated fair value adjustments recognised in equity are included in the income statement. Interest on available-for-sale securities calculated using the effective interest method and cash dividends on available-for-sale equity instruments when the group's right to receive payments is established are recognised in the income statement as part of other income.

(c) Impairment of financial assets

The Group assesses the carrying amounts of financial assets other than those at fair value through profit or loss at each balance sheet date. If there is objective evidence that a financial asset is impaired, the Group determines the amount of impairment loss.

Objective evidence indicating a financial asset is impaired represents matters actually happen subsequently to the initial recognition of the financial assets and exert influences the financial assets' estimated future cash flows which can be reliably measured by the Group.

Evidence of held-to-maturity equity instrument is impaired comprises a significant or prolonged decline in the fair value of an investment in an equity instrument below its cost. The Group assesses all available-for-sale financial assets on an individual basis at each balance sheet date. Impairment loss should be recognised if the fair value of an equity instrument has is than 50% (50% inclusive) of its initial investment cost or in the case that the fair value has been less than the initial investment cost for more than one year (one year inclusive). The Group will consider other relevant factors, such as the price volatility, to determine whether an impairment loss should be recognised for the equity instrument if the decline in the fair value of an equity instrument is more than 20% (20% inclusive) but less than 50% of its initial investment cost. The initial investment cost of held-to-maturity equity instrument is calculated using the weighted average method.

When an impairment loss on a financial asset carried at amortised cost has occurred, the amount of loss is measured at the difference between the asset's carrying amount and the present value of its estimated future cash flows (excluding future credit losses that have not been incurred). If there is objective evidence that the value of the financial asset recovered and the recovery is related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed and the amount of reversal is recognised in profit or loss.

Notes to the Financial Statements

For the period from 1 January 2015 to 30 June 2015

(All amounts in RMB'000 unless otherwise stated)

English Translation for Reference Only

II. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

9. Financial instruments (Continued)

(1) Financial Assets (Continued)

(c) *Impairment of financial assets (Continued)*

When an available-for-sale financial asset is impaired, the cumulative loss arising from decline in fair value that has been recognised directly in equity is reclassified to profit or loss. If, after an impairment loss has been recognised on an available-for-sale debt instrument, the fair value of the debt instrument increases in a subsequent period and the increase can be objectively related to an event occurring after the impairment loss was recognised, the impairment loss is reversed through profit or loss. An impairment loss recognised for an investment in an equity instrument classified as available-for-sale is reversed through equity.

When an impairment loss on an available-for-sale financial asset has occurred, the amount of loss is measured at the difference between the asset's carrying amount and the present value of its estimated future cash flows determined according to the market yield of similar financial assets and recognised in profit or loss. Once the above asset impairment loss is recognised, it will not be reversed in the subsequent periods.

(d) *Derecognition of financial assets*

A financial asset is derecognised when one of the below criteria is met:

- the contractual rights to receive the cash flows from the financial asset expire;
- the financial asset has been transferred and the Group transfers substantially all the risks and rewards of ownership of the financial asset to the transferee;
- the financial asset has been transferred and the Group has not retained control of the financial asset, although the Group neither transfers nor retains substantially all the risks and rewards of ownership of the financial asset.

On derecognition of a financial asset, the difference between the carrying amount and the consideration received and the cumulative changes in fair value that had been recognised directly in equity, is recognised in profit or loss.

Notes to the Financial Statements

For the period from 1 January 2015 to 30 June 2015

(All amounts in RMB'000 unless otherwise stated)

English Translation for Reference Only

II. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

9. Financial instruments (Continued)

(2) Financial liabilities

Financial liabilities are classified into the following categories at initial recognition: financial liabilities at fair value through profit or loss and other financial liabilities. The financial liabilities of the Group are mainly other financial liabilities, including payables, borrowings and debentures payable.

Payables, including accounts payable and other payables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method.

Borrowings and debentures payable are recognised initially at fair value, net of transaction costs incurred and subsequently measured at amortised cost using the effective interest method.

Other financial liabilities with maturities no more than one year are classified as current liabilities. Other financial liabilities with maturities over one year but are due within one year at the balance sheet date are classified as the current portion of non-current liabilities. Others are classified as non-current liabilities.

A financial liability is derecognised or partly derecognised when the current obligation is discharged or partly discharged. The difference between the carrying amount of the financial liability or the derecognised part of the financial liability and the consideration paid is recognised in profit or loss.

(3) Determination of fair value

The fair value of a financial instrument that is traded in an active market is determined at the quoted price in the active market. The fair value of a financial instrument that is not traded in an active market is determined by using an appropriate valuation technique that is applicable to current circumstances and supported by sufficient available data and other information. Valuation techniques mainly include market approach and income approach. When applying valuation techniques, inputs used by market participants in the transactions of the assets or liabilities with similar characteristics would be used and observable inputs would be given priority to the extent possible. Unobservable inputs would only be used when it is impossible or impracticable to obtain relevant observable inputs.

(4) Equity instrument

An equity instrument is a contract that proves the ownership interest of the assets after deducting all liabilities in the Group.

The consideration received from the issuance of equity instruments net of transaction costs is recognised in shareholders' equity.

Consideration and transaction costs paid by the Group for repurchasing self-issued equity instruments are deducted from shareholders' equity.

Notes to the Financial Statements

For the period from 1 January 2015 to 30 June 2015

(All amounts in RMB'000 unless otherwise stated)

English Translation for Reference Only

II. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

10. Receivables

Receivables comprise accounts receivable and other receivables. Accounts receivable arising from sale of goods or rendering of services are initially recognised at fair value of the contractual payments from the buyers or service recipients.

Receivables are assessed for impairment both on an individual basis and on a collective group basis.

Where impairment is assessed on an individual basis, an impairment loss in respect of a receivable is calculated as the excess of its carrying amount over the present value of the estimated future cash flows (exclusive of future credit losses that have not been incurred) discounted at the original effective interest rate. All impairment losses are recognised in profit or loss.

The assessment is made collectively where receivables share similar credit risk characteristics (including those having not been individually assessed as impaired), based on their historical loss experiences, and adjusted by the observable figures reflecting present economic conditions.

If, after an impairment loss has been recognised on receivables, there is objective evidence of a recovery in value of the financial asset which can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed through profit or loss. A reversal of an impairment loss will not result in the asset's carrying amount exceeding that which would have been determined had no impairment loss been recognised in prior years.

(1) Receivables that are individually significant and impairment provided on an individual basis

Criteria of provision for receivable that are individually significant and impairment provided on an individual basis.

Individually significant receivables are the receivables with the individual amount over RMB10 million (inclusive) or accounting to 5% or more of the total receivables.

Method of provision for receivable that are individually significant and impairment provided on an individual basis.

An impairment loss is calculated as the excess of its carrying amount over the present value of the estimated future cash flows (exclusive of future credit losses that have not been incurred) discounted at the original effective interest rate.

(2) Receivable that are individually insignificant but impairment provided on an individual basis:

Criteria of provision for receivables that are individually insignificant but impairment provided on an individual basis.

Within the receivables whose amounts are individually insignificant, impairment is assessed on an individual basis for the overdue receivables unpaid after collection efforts or with unique characteristics.

Method of provision for receivable that are individually insignificant but impairment provided on an individual basis.

An impairment loss is calculated as the excess of its carrying amount over the present value of the estimated future cash flows (exclusive of future credit losses that have not been incurred) discounted at the original effective interest rate.

Notes to the Financial Statements

For the period from 1 January 2015 to 30 June 2015

(All amounts in RMB'000 unless otherwise stated)

English Translation for Reference Only

II. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

10. Receivables (Continued)

(3) Receivables that are assessed for impairment on a collective group basis:

The assessment is made collectively where receivables share similar credit risk characteristics, including those having not been individually assessed as impaired.

Determination method of the group based on credit risk characteristics

Accounts receivable are divided into six groups of containers, vehicles, energy and chemistry equipment, offshore engineering, airport facilities, other business, and due from related parties, land lease prepayments and operating deposits according to the industry and business nature of customers and the characteristics of the receivables. As to Offshore engineering groups, the relevant receivables within credit period have lower credit risk after the grouping based on credit risk characteristics according to individual credit risk assessment and historical data. As to other groups like due from related parties, land lease prepayments operating deposits, and etc, if the credit risk is assessed low after grouping based on the assessment on credit risk and their historical loss experience, no impairment loss is recognised for those groups.

Group 1	Containers
Group 2	Road transportation vehicles
Group 3	Energy, chemical and equipment
Group 4	Airport facilities
Group 5	Logistics services
Group 6	Other business

Methods of provision for receivables assessed on a collective group basis (based on an ageing analysis, a percentage of the total balance and others).

Containers	Provision is determined based on an ageing analysis (Overdue aging)
Road transportation vehicles	Provision is determined based on an ageing analysis (Overdue aging)
Energy, chemical and equipment	Provision is determined based on an ageing analysis (Overdue aging)
Airport facilities	Provision is determined based on an ageing analysis (Overdue aging)
Logistics services	Provision is determined based on an ageing analysis (Overdue aging)
Other business	Provision is determined based on an ageing analysis (Overdue aging)

Notes to the Financial Statements

For the period from 1 January 2015 to 30 June 2015

(All amounts in RMB'000 unless otherwise stated)

English Translation for Reference Only

II. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

10. Receivables (Continued)

(3) Receivables that are assessed for impairment on a collective group basis: (Continued)

For the above groups, provision is made based on their respective ageing analysis follows:

A	1, 2, 4, 5, 6	3
Within 1 year (inclusive)	5%	0%~5%
1 to 2 years (inclusive)	30%	30%
Over 2 years	100%	100%

(4) When the Group transfers the accounts receivable to the financial institutions without recourse, the difference between the proceeds received from the transaction and their carrying amounts and the related taxes is recognised in profit or loss for the current period.

11. Inventories

(1) Classification

Inventories include raw materials, work in progress, semi-finished goods, finished goods and reusable materials. Reusable materials include low-value consumables, packaging materials and other materials, which can be used repeatedly but do not meet the definition of fixed assets.

(2) Cost of inventories

Cost of inventories is calculated using the weighted average method.

(3) The underlying factors in the determination of net realisable values of inventories and basis of provision for decline in value of inventories

Inventories are initially measured at cost. Cost of inventories comprises all costs of purchase, costs of conversion and other expenditures incurred in bringing the inventories to their present location and condition. Borrowing costs directly related to the production of qualifying inventories are also included in the cost of inventories (see Note II.16). In addition to the purchasing cost of raw materials, work in progress and finished goods include direct labour costs and an appropriate allocation of production overheads.

Notes to the Financial Statements

For the period from 1 January 2015 to 30 June 2015

(All amounts in RMB'000 unless otherwise stated)

English Translation for Reference Only

II. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

11. Inventories (Continued)

(3) The underlying factors in the determination of net realisable values of inventories and basis of provision for decline in value of inventories (Continued)

At the balance sheet date, inventories are carried at the lower of cost and net realisable value.

Net realisable value is the estimated selling price in the normal course of business less the estimated costs to completion and the estimated expenses and related taxes necessary to make the sale. The net realisable value of materials held for use in the production of inventories is measured based on the net realisable value of the finished goods in which they will be incorporated. The net realisable value of the quantity of inventory held to satisfy sales or service contracts is based on the contract price. If the quantities of inventories specified in sales contracts are less than the quantities held by the Group, the net realisable value of the excess portion of inventories shall be based on general selling prices.

Any excess of the cost over the net realisable value of each class of inventories is recognised in profit or loss as a provision for diminution in the value of inventories.

(4) Inventory system

The Group maintains a perpetual inventory system.

(5) Amortisation of reusable material including low-value consumables and packaging material

Reusable materials including low-value consumables and packaging materials are amortised in full when received for use. The amounts of the amortisation are included in the cost of the related assets or profit or loss.

12. Long-term equity investments

Long-term equity investments comprise the Company's long-term equity investments in its subsidiaries and the Group's long-term equity investments in its joint ventures and associates.

Subsidiaries are the investees over which the Company is able to exercise control. Joint ventures are the investees over which the Group is able to exercise joint control together with other ventures and the Group enjoys the rights only on the net assets of investees. Associates are the investees that the Group has significant influence on their financial and operating policies.

Investments in subsidiaries are presented in the Company's financial statements using the cost method, and are adjusted for preparing the consolidated financial statements using the equity method. Investments in joint ventures and associates are accounted for using the equity method.

Notes to the Financial Statements

For the period from 1 January 2015 to 30 June 2015

(All amounts in RMB'000 unless otherwise stated)

English Translation for Reference Only

II. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

12. Long-term equity investments (Continued)

(1) Determination of investment cost

For long-term equity investments acquired through a business combination: for long-term equity investments acquired through a business combination involving enterprises under common control, the investment cost shall be the absorbing party's share of the carrying amount of owners' equity of the party being absorbed at the combination date; for long-term equity investment acquired through a business combination involving enterprises not under common control, the investment cost shall be the combination cost.

For long-term equity investments acquired not through a business combination: for long-term equity investment acquired by payment in cash, the initial investment cost shall be the purchase price actually paid; for long-term equity investments acquired by issuing equity securities, the initial investment cost shall be the fair value of the equity securities issued.

(2) Subsequent measurement

For long-term equity investments accounted for using the cost method, they are measured at the initial investment costs, and cash dividends or profit distribution declared by the investees are recognised as investment income in profit or loss.

For long-term equity investments accounted for using the equity method, where the initial investment cost of a long-term equity investment exceeds the Group's share of the fair value of the investee's identifiable net assets at the acquisition date, the long-term equity investment is measured at the initial investment cost; where the initial investment cost is less than the Group's share of the fair value of the investee's identifiable net assets at the acquisition date, the difference is included in profit or loss and the cost of the long-term equity investment is adjusted upwards accordingly.

For long-term equity investments accounted for using the equity method, the Group recognises the investment income according to its share of net profit or loss of the investee. If the accounting policies and the accounting periods are inconsistent between the Company and investees, the financial statements of investees are adjusted in accordance with the accounting policies and accounting period of the Company. The Group discontinues recognising its share of net losses of an investee after the carrying amount of the long-term equity investment together with any long-term interests that, in substance, form part of the investor's net investment in the investee are reduced to zero. However, if the Group has obligations for additional losses and the criteria with respect to recognition of provisions under the accounting standards on contingencies are satisfied, the Group continues recognising the investment losses and the provisions. For changes in owners' equity of the investee other than those arising from its net profit or loss, the Group records its proportionate share directly into capital surplus, provided that the Group's proportion of shareholding in the investee remains unchanged. The carrying amount of the investment is reduced by the Group's share of the profit distribution or cash dividends declared by an investee. The unrealised profits or losses arising from the intra-group transactions amongst the Group and its investees are eliminated in proportion to the Group's equity interest in the investees, and then based on which the investment gains or losses are recognised. For the loss on the intra-group transaction amongst the Group and its investees attributable to asset impairment, any unrealised loss is not eliminated.

Notes to the Financial Statements

For the period from 1 January 2015 to 30 June 2015

(All amounts in RMB'000 unless otherwise stated)

English Translation for Reference Only

II. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

12. Long-term equity investments (Continued)

(3) Basis for determining the existence of joint control or significant influence over an investee

Control is the power over the investee to enjoy variable returns by participating in related activities of the investee and the ability to affect the return amount by executing the power over the investee.

Joint control is the sharing of control over an arrangement according to related agreement, and exists only when the decisions relating to the activity of the arrangement require the unanimous consent of the parties sharing control.

Significant influence is the power to participate in the determination of financial and operating policies of the investee, but is not control or joint control over those policies.

(4) Method of impairment testing and measuring

The carrying amount of long-term equity investments in subsidiaries, joint ventures and associates is reduced to the recoverable amount if the recoverable amount is below the carrying amount.

Notes to the Financial Statements

For the period from 1 January 2015 to 30 June 2015

(All amounts in RMB'000 unless otherwise stated)

English Translation for Reference Only

II. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

13. Investment properties

Investment properties are properties held either to earn rental income or for capital appreciation or for both. Investment properties are accounted for using the cost model and stated in the balance sheet at cost less accumulated depreciation, amortisation and impairment losses. Subsequent expenditures incurred in relation to an investment property are included in the cost of the investment property when it is probable that the associated economic benefits will flow to the Group and their costs can be reliably measured; otherwise, the expenditures are recognised in profit or loss in the period in which they are incurred. An investment property is depreciated or amortised, less its estimated residual value, using the straight line method over its estimated useful life, unless the investment properties are classified as held for sale (see Note II.28). For the method of impairment testing and measuring, refer to Note II.20.

The useful lives, residual value rate and depreciation/amortisation rate of each class of investment properties are as follows:

	Useful life (years)	Residual value rate (%)	Depreciation/amortisation rate (%)
Land use rights	29 – 50 years	–	2% – 3.4%
Plant and buildings	20 – 30 years	10%	3% – 4.5%

When an investment property is transferred to owner-occupied properties, it is reclassified as fixed asset or intangible asset at the date of the transfer. When an owner-occupied property is transferred out for earning rentals or for capital appreciation, the fixed asset or intangible asset is reclassified as investment properties at its carrying amount at the date of the transfer.

The investment property's estimated useful life, net residual value and depreciation (amortisation) method applied are reviewed and adjusted as appropriate at each year-end.

An investment property is derecognised on disposal or when the investment property is permanently withdrawn from use and no future economic benefits are expected from its disposal. The net amount of proceeds from sale, transfer, retirement or damage of an investment property after its carrying amount and related taxes and expenses is recognised in profit or loss for the current period.

Notes to the Financial Statements

For the period from 1 January 2015 to 30 June 2015

(All amounts in RMB'000 unless otherwise stated)

English Translation for Reference Only

II. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

14. Fixed assets

(1) Recognition

Fixed assets represent the tangible assets held by the Group for use in the production of goods or supply of services, for rental to others or for operation and administrative purposes with useful lives over one year.

The cost of a purchased fixed asset comprises the purchase price, related taxes, and any directly attributable expenditure for bringing the asset to working condition for its intended use. The cost of self-constructed assets is measured in accordance with the policy set out in Note II.14.

Where parts of an item of fixed asset have different useful lives or provide benefits to the Group in different patterns thus necessitating use of different depreciation rates or methods, each part is recognised as a separate fixed asset.

The subsequent costs including the cost of replacing part of an item of fixed assets are recognised in the carrying amount of the item if the to recognise fixed assets criteria are satisfied, and the carrying amount of the replaced part is derecognised. The costs of the day-to-day servicing of fixed assets are recognised in profit or loss as incurred.

Fixed assets are stated in the balance sheet at cost less accumulated depreciation and impairment losses.

Notes to the Financial Statements

For the period from 1 January 2015 to 30 June 2015

(All amounts in RMB'000 unless otherwise stated)

English Translation for Reference Only

II. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

14. Fixed assets (Continued)

(2) Depreciation

Fixed assets are depreciated using the straight-line method to allocate the cost of the assets to their estimated residual values over their estimated useful lives, unless the fixed asset is classified as held for sale (see Note II.28). For the fixed assets that have been provided for impairment loss, the related depreciation charge is prospectively determined based upon the adjusted carrying amounts over their remaining useful lives. The estimated useful lives, residual values and depreciation rates of each class of fixed assets are as follows:

Plants and buildings	20 – 30 years	10%	3 – 4.5%
Machinery and equipment	10 -12 years	10%	7.5 – 9%
Office and other equipment	3 – 5 years	10%	18 – 30%
Motor vehicles	5 years	10%	18%
Dock, wharf	50 years	10%	1.8%
Offshore engineering equipment	15 – 30 years	10%	3 – 6%

Useful lives, residual value and depreciation methods are reviewed at least at each year-end.

(3) For the method of impairment testing and measuring, refer to Note II.20.

(4) Basis for identification of fixed assets held under finance leases and related measurement

For criteria of recognition and method of measuring for fixed assets under a finance lease, refer to Note II 27(3).

(5) Disposal

A fixed asset is derecognised on disposal or when no future economic benefits are expected from its use or disposal. The amount of proceeds from disposal on sale, transfer, retirement or damage of a fixed asset net of its carrying amount and related taxes and expenses is recognised in profit or loss for the current period.

Notes to the Financial Statements

For the period from 1 January 2015 to 30 June 2015

(All amounts in RMB'000 unless otherwise stated)

English Translation for Reference Only

II. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

15. Construction in progress

Construction in progress is measured at actual cost. The cost of self-constructed assets includes the cost of materials, direct labour, capitalised borrowing costs (see Note II.16), and any other costs directly attributable to bringing the asset to working condition for its intended use.

A self-constructed asset is included in construction in progress before it is transferred to fixed asset when it is ready for its intended use. No depreciation is provided against construction in progress. Construction in progress is stated in the balance sheet at cost less impairment losses (see Note II.20).

16. Borrowing costs

Borrowing costs incurred directly attributable to the acquisition, construction or production of a qualifying asset are capitalised as part of the cost of the asset.

Except for the above, other borrowing costs are recognised as financial expenses in the income statement when incurred.

During the capitalisation period, the amount of interest (including amortisation of any discount or premium on borrowing) to be capitalised in each accounting period is determined as follows:

- Where funds are borrowed specifically for the acquisition, construction or production of a qualifying asset, the amount of interest to be capitalised is the interest expense calculated using effective interest rates during the period less any interest income earned from depositing the borrowed funds or any investment income on the temporary investment of those funds before being used on the asset.
- Where funds are borrowed generally and used for the acquisition, construction or production of a qualifying asset, the amount of interest to be capitalised on such borrowings is determined by applying a capitalisation rate to the weighted average of the excess amounts of cumulative expenditures on the asset over the above amounts of specific borrowings. The capitalisation rate is the weighted average of the interest rates applicable to the general-purpose borrowings.

The effective interest rate is determined as the rate that exactly discounts estimated future cash flow through the expected life of the borrowing or, when appropriate, a shorter period to the initially recognised amount of the borrowings.

During the capitalisation period, exchange differences related to the principal and interest on a specific-purpose borrowing denominated in foreign currency are capitalised as part of the cost of the qualifying asset. The exchange differences related to the principal and interest on foreign currency borrowings other than a specific-purpose borrowing are recognised as a financial expense in the period in which they are incurred.

Notes to the Financial Statements

For the period from 1 January 2015 to 30 June 2015

(All amounts in RMB'000 unless otherwise stated)

English Translation for Reference Only

II. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

16. Borrowing costs (Continued)

The capitalisation period is the period from the date of commencement of capitalisation of borrowing costs to the date of cessation of capitalisation, excluding any period over which capitalisation is suspended. Capitalisation of borrowing costs commences when expenditure for the asset is being incurred, borrowing costs are being incurred and activities of acquisition, construction or production that are necessary to prepare the asset for its intended use or sale are in progress, and ceases when the assets become ready for their intended use or sale. Capitalisation of borrowing costs is suspended when the acquisition, construction or production activities are interrupted abnormally and the interruption lasts over three months.

17. Intangible assets

Intangible assets are stated in the balance sheet at cost less accumulated amortisation (where the estimated useful life is finite) and impairment losses (see Note II.20). For an intangible asset with finite useful life, its cost less residual value and impairment loss is amortised on the straight-line method or other more appropriate methods that can reflect the pattern in which the asset's economic benefits are expected to be realised over its estimated useful life, unless the intangible asset is classified as held for sale (see Note II.28).

The respective amortisation periods for such intangible assets are as follows:

Land use rights	20 – 50
Maritime space use rights	40 – 50
Technological know-how and trademarks	5 – 10
Timber concession rights	20
Customer relationships	3 – 8
Customer contracts	3 – 4

For an intangible asset with a finite useful life, review of its useful life and amortisation method is performed at each year-end, with adjustment made as appropriate.

An intangible asset is regarded as having an indefinite useful life and is not amortised when there is no foreseeable limit to the period over which the asset is expected to generate economic benefits for the Group.

Notes to the Financial Statements

For the period from 1 January 2015 to 30 June 2015

(All amounts in RMB'000 unless otherwise stated)

English Translation for Reference Only

II. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

17. Intangible assets (Continued)

Expenditures on an internal research and development project are classified into expenditures on the research phase and expenditures on the development phase. Research is original and planned investigation undertaken with the prospect of gaining new scientific or technical knowledge and understanding. Development is the application of research findings or other knowledge to a plan or design for the production of new or substantially improved materials, devices, products or processes before the start of commercial production or use.

The expenditure on an internal research and development project is classified into expenditure on the research phase and expenditure on the development phase based on its nature and whether there is material uncertainty that the research and development activities can form an intangible asset at end of the project.

Expenditure on the research phase is recognised in profit or loss in the period in which it is incurred. Expenditure on the development phase is capitalised only if all of the following conditions are satisfied:

- it is technically feasible to complete the intangible asset so that it will be available for use or sale;
- management intends to complete the intangible asset, and to use or sell it;
- it can be demonstrated how the intangible asset will generate economic benefits;
- there are adequate technical, financial and other resources to complete the development and the ability to use or sell the intangible asset; and
- the expenditure attributable to the intangible asset during its development phase can be reliably measured.

Other development expenditures that do not meet the conditions above are recognised in profit or loss in the period in which they are incurred. Development costs previously recognised as expenses are not recognised as an asset in a subsequent period. Capitalised expenditure on the development phase is presented as development costs in the balance sheet and transferred to intangible assets at the date that the asset is ready for its intended use.

18. Goodwill

Goodwill represents the excess of cost of acquisition over the acquirer's interest in the fair value of the identifiable net assets of the acquiree under the business combination involving entities not under common control.

Goodwill is not amortised and is stated at cost less accumulated impairment losses (see Note II.20). On disposal of an asset group or a set of asset groups, any attributable amount of purchased goodwill is written off and included in the calculation of the profit or loss on disposal.

Notes to the Financial Statements

For the period from 1 January 2015 to 30 June 2015

(All amounts in RMB'000 unless otherwise stated)

English Translation for Reference Only

II. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

19. Long-term prepaid expenses

Long-term prepaid expenses are amortised on a straight-line method within the beneficial period.

The respective amortisation periods for such long-term prepaid expenses are as follows:

	A
Water and electricity capacity enlargement expenses	5 to 10 years
Rental	2 to 10 years
Others	5 to 10 years

20. Impairment of long-term assets

Fixed assets, construction in progress, intangible assets with finite useful lives, investment properties measured using the cost model and long-term equity investments in subsidiaries, joint ventures and associates are tested for impairment if there is any indication that the assets may be impaired at the balance sheet date. Intangible asset that is not ready for its intended use is tested at least annually for impairment, irrespective of whether there is any indication that it may be impaired. If the result of the impairment test indicates that the

Notes to the Financial Statements

For the period from 1 January 2015 to 30 June 2015

(All amounts in RMB'000 unless otherwise stated)

English Translation for Reference Only

II. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

21. Provisions and contingent liabilities

Provisions for product warranties, onerous contracts etc. are recognised when the Group has a present obligation, it is probable that an outflow of economic benefits will be required to settle the obligation, and the amount of the obligation can be measured reliably.

A provision is initially measured at the best estimate of the expenditure required to settle the related present obligation. Factors surrounding a contingency, such as the risks, uncertainties and the time value of money, are taken into account as a whole in reaching the best estimate of a provision. Where the effect of the time value of money is material, the best estimate is determined by discounting the related future cash outflows. The increase in the discounted amount of the provision arising from passage of time is recognised as interest expense.

The carrying amount of provisions is reviewed at each balance sheet date and adjusted to reflect the current best estimate.

In terms of a possible obligation resulting from a past transaction or event, whose existence will only be confirmed by the occurrence or non-occurrence of uncertain future events or a present obligation resulting from a past transaction or event, where it is not probable that the settlement of the above obligation will cause an outflow of economic benefits, or the amount of the outflow cannot be estimated reliably, the possible or present obligation is disclosed as a contingent liability.

22. Share-based payments

(1) Classification

Share-based payment transactions in the Group are classified as equity-settled share-based payments and cash-settled share-based payments.

(2) Method to determine the fair value of equity instruments

Fair value of stock option is estimated based on binomial lattice model. Contract term of the stock option is used as the input variable of this model. And the binomial lattice model includes estimation of early execution of the option. The following factors are taken into account when using the binomial lattice model: (1) exercise price of the option; (2) vesting period; (3) current price of basic stocks; (4) expected fluctuation of stocks; (5) expected dividends of stocks; (6) risk-free rate within the option term.

Notes to the Financial Statements

For the period from 1 January 2015 to 30 June 2015

(All amounts in RMB'000 unless otherwise stated)

English Translation for Reference Only

II. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

22. Share-based payments (Continued)

(3) Basis of the best estimate of the number of equity instruments expected to vest

At each balance sheet date during the vesting period, the Group makes the best estimation according to the latest information of the number of employees who are granted to vest and revises the number of equity instruments expected to vest. On vesting date, the estimate shall be equal to the number of equity instruments that ultimately vested.

(4) Accounting treatment for share-based payment

(a) *Equity-settled share-based payments*

Where the Group uses shares or other equity instruments as consideration for services received from the employees, the payment is measured at the fair value of the equity instruments granted to the employees at the grant date. If the equity instruments granted to employees vest immediately, the fair value of the equity instruments granted is, on grant date, recognised as relevant cost or expenses with a corresponding increase in capital reserve. If the equity instruments granted to employees do not vest until the completion of services for a vesting period, or until the achievement of a specified performance condition, the Group, at each balance sheet date during the vesting period, makes the best estimation according to the latest information of the number of employees who are granted to vest and revises the number of equity instruments expected to vest. Based on the best estimation, the Group recognises the services received for the current period as related costs or expenses, with a corresponding increase in capital reserve, at an amount equal to the fair value of the equity instruments at the grant date.

(b) *Cash-settled share-based payments*

Where the Group receives services from employees by incurring a liability to deliver cash or other assets for amounts that are determined based on the price of shares or other equity instruments, the service received from employees is measured at the fair value of the liability incurred. If the rights under a cash-settled share-based payment do not vest until the completion of services for a vesting period, or until the achievement of a specified performance condition, the Group, at each balance sheet date during the vesting period, recognises the services received for the current period as related costs or expenses, with a corresponding increase in liability, at an amount equal to the fair value of the liability based on the best estimate of the outcome of vesting.

Notes to the Financial Statements

For the period from 1 January 2015 to 30 June 2015

(All amounts in RMB'000 unless otherwise stated)

English Translation for Reference Only

II. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

23. Revenue recognition

Revenue is the gross inflow of economic benefit in the periods arising in the course of the Group's ordinary activities when the inflows result in increase in shareholders' equity, other than increase relating to contributions from shareholders. Revenue is recognised in profit or loss when it is probable that the economic benefits will flow to the Group, the revenue and costs can be measured reliably and the following respective conditions are met.

(1) Sale of goods

Revenue from sale of goods is recognised when all of the general conditions stated above and following conditions are satisfied:

- The significant risks and rewards of ownership of goods have been transferred to the buyer;
- The Group retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold.

Revenue from the sale of goods is measured at the fair value of the considerations received or receivable under the sales contract or agreement.

(a) Containers and airport facilities sales revenue

The group recognises revenue after receive acceptance certificates from customers.

(b) Road transportation vehicles sales revenue

Sales of road transportation vehicles are divided into sales to domestic customers and sales to overseas customers. As to sales to domestic customers, the Group recognises revenue after customers pick up vehicles. As to sales to overseas customers, the Group recognises revenue after vehicles are loaded to specified ship in specific port assigned by the customer pursuant to contracts.

(c) Real estate sales revenue

After the property is completed and pass the acceptance inspection so as to achieve the delivery conditions according to sales contract, the Group recognises revenue if it receives proof of payment based on sales contract (usually when it receives the initial payment and has arranged the remaining payment schedule).

Notes to the Financial Statements

For the period from 1 January 2015 to 30 June 2015

(All amounts in RMB'000 unless otherwise stated)

English Translation for Reference Only

II. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

23. Revenue recognition (Continued)

(2) Revenue from construction contracts

Where the outcome of a construction contract can be estimated reliably, contract revenue and contract expenses associated with the construction contract are recognised at the balance sheet date using the percentage of completion method.

The stage of completion of a contract is determined based on completion of a physical proportion of the contract work.

When the outcome of a construction contract cannot be estimated reliably:

- (a) If the contract costs can be recovered, revenue is recognised to the extent of contract costs incurred that can be recovered, and the contract costs are recognised as contract expenses when incurred;
- (b) If the contract costs cannot be recovered, the contract costs are recognised as contract expenses immediately when incurred, and no contract revenue is recognised.

Construction contract revenue includes initial revenue stipulated by contract and increased amount generated by contract alteration.

Increased amount cannot be recognised as contract revenue unless the following contract alteration terms are all satisfied:

- (c) Client accepts and confirms the increased amount generated by contract alteration;
- (d) Increased amount can be reliably measured.

Contract anticipated loss is recognised when estimated total construction contract cost exceeds contract revenue. Provision should be made for contract anticipated loss and charged into profit and losses for the current period.

Notes to the Financial Statements

For the period from 1 January 2015 to 30 June 2015

(All amounts in RMB'000 unless otherwise stated)

English Translation for Reference Only

II. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

23. Revenue recognition (Continued)

(3) Rendering of services

Revenue from rendering of services is measured at the fair value of the considerations received or receivable under the contract or agreement.

At the balance sheet date, where outcome of a transaction involving the rendering of services can be estimated reliably, revenue from the rendering of services is recognised by reference to the stage of completion of the transaction based on the progress of work performed.

Where outcome of rendering of services cannot be estimated reliably, if the costs incurred are expected to be recoverable, revenues are recognised to the extent that the costs incurred that are expected to be recoverable, and an equivalent amount is charged to profit or loss as service cost; if the costs incurred are not expected to be recoverable, the costs incurred are recognised in profit or loss and no service revenue is recognised.

For freight agencies, revenues are recognised at the ship departure date (export) or the arrival date (import). As to land freight agencies, revenues are recognised when goods have arrived at the specified location. For shipping agency: revenues are recognised at the day that ship departures.

(4) Transfer of asset use rights

Interest income is recognised on a time proportion basis with reference to the principal outstanding and the applicable effective interest rate.

Income from an operating lease is recognised on a straight-line basis over the period of the lease. Income from a financing lease is recognised on real interest method over the period of the lease.

Notes to the Financial Statements

For the period from 1 January 2015 to 30 June 2015

(All amounts in RMB'000 unless otherwise stated)

English Translation for Reference Only

II. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

24. Employee benefits

Employee benefits represent all kinds of allowances and compensations paid by the Group for services rendered by employees or for termination of employment relationship, which mainly include short-term wages, pension benefits and termination of employment benefits.

(1) Short-term wages

Short-term wages include wages or salaries, bonuses, allowances and subsidies, staff welfare, medical insurance, work injury insurance, maternity insurance, housing funds, labour union funds, employee education funds and short term paid absence and etc. Actual short-term wages are recognised as liabilities in the periods when the employees render services and are charged into profit or loss or capitalised in costs of related assets. The non-monetary welfare is measured at fair value.

(2) Pension benefits

During the reporting period, the Group's pension benefits are basic pension insurance and unemployment insurance which are all defined contribution plans.

- Basic pension insurance

The Group's employees participated in the basic social pension insurance organised and implemented by local labour and social security bureau. The Group paid the basic pension issuance expenses monthly to designated insurance companies for its employees according to the basis amounts and rates determined by the local regulations. After retirement, local labour and social security bureau is responsible for paying the pension benefit to the retired employees. The amounts of pension insurance payable calculated according to the above regulations are recognised as liabilities during the periods when the employees render services and are charged to profit or loss or capitalised in costs of related assets.

(3) Enterprise annuities plan

The Group provides compensation for the termination of employment relationship before the expiry of employment contracts or compensation to encourage employees' voluntary layoffs, which is recognised as a liability and charged to profit or loss on the earlier one when the Group is unable to unilaterally withdraw the plan on the termination of employment relationship or the layoff proposal and costs and expenses in relation to the payment of compensation to the termination of employment relationship are recognised.

The Enterprise annuities plan with payment within one year at the balance sheet date are classified as current liabilities.

Notes to the Financial Statements

For the period from 1 January 2015 to 30 June 2015

(All amounts in RMB'000 unless otherwise stated)

English Translation for Reference Only

II. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

25. Government grants

Government grants are transfers of monetary assets or non-monetary assets from the government to the Group at nil consideration except for the capital contribution from the government as an investor in the Group, including refund of taxes and financial subsidies, etc. Special funds such as investment grants allocated by the government, if clearly defined in official documents as part of "capital reserve" are dealt with as capital contributions, and not regarded as government grants.

A government grant is recognised when the conditions attached to it can be complied with and the government grant can be received.

If a government grant in the form of transfer of monetary assets, the grant is measured at the amount received or receivable. For a government grant in the form of transfer of non-monetary assets, it is measured at fair value; if the fair value is not reliably determinable; the grant is measured at nominal amount.

Government grants related to assets represent grants obtained from government which are to compensate long-term assets purchased or other ways. Government grants related to income represent those government grants other than related to assets.

A government grant related to an asset is recognised as deferred income, and evenly amortised to profit or loss over the useful life of the related asset. Government grants measured at nominal amounts are recognised immediately in profit or loss for the current period.

For government grants related to income, where the grant is a compensation for related expenses or losses to be incurred by the Group in the subsequent periods, the grant is recognised as deferred income, and included in profit or loss over the periods in which the related costs are recognised; where the grant is a compensation for related expenses or losses already incurred by the Group, the grant is recognised immediately in profit or loss for the current period.

26. Deferred tax assets and deferred tax liabilities

Deferred tax assets and liabilities arise from deductible and taxable temporary differences respectively, being the differences between the carrying amounts of assets and liabilities for financial reporting purposes and their tax bases, which include the deductible losses and tax credits carry forward to subsequent periods. Deferred tax assets are recognised to the extent that it is probable that future taxable profits will be available against which deductible temporary differences can be utilised.

Deferred tax is not recognised for the temporary differences arising from the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting profit nor taxable profit (or tax loss). No deferred tax liability is recognised for a temporary difference arising from the initial recognition of goodwill.

At the balance sheet date, the amount of deferred tax recognised is measured based on the expected manner of recovery or settlement of the carrying amount of the assets and liabilities, using tax rates that are expected to be applied in the period when the asset is recovered or the liability is settled in accordance with tax laws.

Notes to the Financial Statements

For the period from 1 January 2015 to 30 June 2015

(All amounts in RMB'000 unless otherwise stated)

English Translation for Reference Only

II. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

26. Deferred tax assets and deferred tax liabilities (Continued)

The carrying amount of a deferred tax asset is reviewed at each balance sheet date. The carrying amount of a deferred tax asset is reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow the benefit of the deferred tax asset to be utilised. Such reduction is reversed to the extent that it becomes probable that sufficient taxable profits will be available.

Deferred tax liabilities are recognised for temporary differences arising from investments in subsidiaries, associates and joint ventures, except where the Group is able to control the timing of reversal of the temporary difference, and it is probable that the temporary difference will not reverse in the foreseeable future. When it is probable that the temporary differences arising from investments in subsidiaries, associates and joint ventures will be reversed in the foreseeable future and that the taxable profit will be available in the future against which the temporary differences can be utilised, the corresponding deferred tax assets are recognised.

At the balance sheet date, deferred tax assets and liabilities are offset if all the following conditions are met:

- the taxable entity has a legally enforceable right to set off current tax assets against current tax liabilities; and
- they relate to income taxes levied by the same tax authority on either the same taxable entity; or different taxable entities which either intend to settle the current tax liabilities and assets on a net basis, or to realize the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

27. Operating and finance leases

A lease is classified as either a finance lease or an operating lease. A finance lease is a lease that transfers substantially all the risks and rewards incidental to ownership of a leased asset to the lessee, irrespective of whether the legal title to the asset is eventually transferred. An operating lease is a lease other than a finance lease.

(1) Operating lease charges

Rental payments under operating leases are recognised as costs or expenses on a straight-line basis over the lease term.

Notes to the Financial Statements

For the period from 1 January 2015 to 30 June 2015

(All amounts in RMB'000 unless otherwise stated)

English Translation for Reference Only

II. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

27. Operating and finance leases (Continued)

(2) Assets leased out under operating leases

Fixed assets leased out under operating leases, except for investment properties (see Note II.13) are depreciated in accordance with the Group's depreciation policies described in Note II.14(2). Impairment losses are provided for in accordance with the accounting policy described in Note II.20. Other leased out assets under operating leases are amortised using the straight-line method. Income derived from operating leases is recognised in the income statement using the straight-line method over the lease term. If initial direct costs incurred in respect of the assets leased out are material, the costs are initially capitalised and subsequently amortised in profit or loss over the lease term on the same basis as the lease income. Otherwise, the costs are charged to profit or loss immediately.

(3) Assets acquired under finance leases

When the Group acquires an asset under a finance lease, the asset is measured at an amount equal to the lower of its fair value and the present value of the minimum lease payments, each determined at the inception of the lease. At the commencement of the lease term, the minimum lease payments are recorded as long-term payables. The difference between the value of the leased assets and the minimum lease payments is recognised as unrecognised finance charges. Initial direct costs that are attributable to a finance lease incurred by the Group are added to the amounts recognised for the leased asset. Depreciation and impairment losses are accounted for in accordance with the accounting policies described in Notes II.14(2) and II.20, respectively.

If there is a reasonable certainty that the Group will obtain ownership of a leased asset at the end of the lease term, the leased asset is depreciated over its estimated useful life. Otherwise, the leased asset is depreciated over the shorter of the lease term and its estimated useful life.

Unrecognised finance charge under finance lease is amortised using an effective interest method over the lease term. The amortisation is accounted for in accordance with principles of borrowing costs (see Note II.16).

At the balance sheet date, long-term payables arising from finance leases, net of the unrecognised finance charges, are presented as long-term payables or non-current liabilities due within one year, respectively, in the balance sheet.

Notes to the Financial Statements

For the period from 1 January 2015 to 30 June 2015

(All amounts in RMB'000 unless otherwise stated)

English Translation for Reference Only

II. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

27. Operating and finance leases (Continued)

(4) Assets leased out under finance leases

At the commencement of the lease term, the Group recognises the aggregate of the minimum lease receipts determined at the inception of a lease and the initial direct costs as finance lease receivable. The difference between the aggregate of the minimum lease receipts, the initial direct costs, and the aggregate of their present value is recognised as unearned finance income.

Unearned finance income is allocated to each accounting period during the lease term using the effective interest method. At the balance sheet date, finance lease receivables, net of unearned finance income, are presented as long-term receivables or non-current assets due within one year, respectively in the balance sheet.

28. Assets held for sale and discontinued operation

A non-current asset or disposal group is classified as held for sale when meet the following criteria:

- The non-current asset or disposal group could be disposed immediately according to usual terms at present condition;
- The disposal plan has been approved properly;
- An non-cancellable transfer agreement has been signed with the transferee;
- This transfer is expected to be completed within one year;

Non-current assets held for sale are stated at the lower of carrying amount and net realisable value. Any excess of the carrying amount over the net realisable value is recognised as impairment loss.

Notes to the Financial Statements

For the period from 1 January 2015 to 30 June 2015

(All amounts in RMB'000 unless otherwise stated)

English Translation for Reference Only

II. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

28. Assets held for sale and discontinued operation (Continued)

Assets and liabilities of a non-current asset or disposal group which is classified as held for sale are classified as current assets and current liabilities.

A discontinued operation is a component which has been disposed or classified as held for sale of the group's business and the operations and financial reporting of the discontinued operation can be clearly distinguished from the rest of the group and can meet one of the following criteria:

- This component of the business represents a separate major line of business or geographic area of operations;
- This component of the business is part of a single co-ordinated plan to dispose of a separate major line of business or geographical area of operations;
- This component of the business is a subsidiary acquired exclusively with a view to resale.

29. Hedge accounting

Hedge accounting is a method which recognises the offsetting effects on profit or loss of changes in the fair values of the hedging instrument and the hedged item in the same accounting period(s).

Hedged items are the items that expose the Group to risks of changes in fair value or future cash flows and that are designated as being hedged. The Group's hedged item include a forecast transaction that is settled with a fixed amount of foreign currency and expose the Group to foreign currency risk.

A hedging instrument is a designated derivative whose changes in fair value or cash flows are expected to offset changes in the fair value or cash flows of the hedged item. For a hedge of foreign currency risk, a non-derivative financial asset or non-derivative financial liability may also be used as a hedging instrument.

The hedge is assessed by the Group for effectiveness on an ongoing basis and judged whether it has been highly effective throughout the accounting periods for which the hedging relationship was designated. A hedge is regarded as highly effective if both of the following conditions are satisfied:

- at the inception and in subsequent periods, the hedge is expected to be highly effective in achieving offsetting changes in fair value or cash flows attributable to the hedged risk during the period for which the hedge is designated;
- the actual results of offsetting are within a range of 80% to 125%.

Notes to the Financial Statements

II. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

30. Dividend distribution

Cash dividend is recognised as a liability for the period in which the dividend is approved by the shareholders' meeting.

Dividends or distributions of profits proposed in the profit appropriation plan which will be authorised and declared after the balance sheet date, are not recognised as a liability at the balance sheet date but disclosed in the notes separately.

31. Related parties

If a party has the power to control, jointly control or exercise significant influence over another party, or vice versa, or where two or more parties are subject to common control or joint control from another party, they are considered to be related parties. Related parties may be individuals or enterprises. Enterprises with which the Company is under common control only from the State and that have no other related party relationships are not regarded as related parties of the Group. Related parties of the Group and the Company include, but are not limited to:

- (a) the Company's parent;
- (b) the Company's subsidiaries;
- (c) enterprises that are controlled by the Company's parent;
- (d) investors that have joint control or exercise significant influence over the Group;
- (e) enterprises or individuals if a party has control, joint control over both the enterprises or individuals and the Group;
- (f) joint ventures of the Group, including subsidiaries of joint ventures;
- (g) associates of the Group, including subsidiaries of associates;
- (h) principal individual investors and close family members of such individuals;
- (i) key management personnel of the Group and close family members of such individuals;

II. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

31. Related parties (Continued)

- (j) key management personnel of the Company's parent and close family members of such individuals;
- (k) close family members of key management personnel of the Company's parent; and
- (l) other enterprises that are controlled or jointly controlled by principal individual investors, key management personnel of the Group, and close family members of such individuals.

Besides the related parties stated above determined in accordance with the requirements of CAS, the following enterprises and individuals are considered as (but not restricted to) related parties based on the disclosure requirements of Administrative Procedures on the Information Disclosures of Listed Companies issued by the CSRC:

- (m) enterprises or persons that act in concert that hold 5% or more of the Company's shares;
- (n) individuals and close family members of such individuals who directly or indirectly hold 5% or more of the Company's shares, supervisors for listed companies and their close family members;
- (o) enterprises that satisfy any of the aforesaid conditions in (a), (c) and (m) during the past 12 months or will satisfy them within the next 12 months pursuant to a relevant agreement;
- (p) individuals who satisfy any of the aforesaid conditions in (i), (j) and (n) during the past 12 months or will satisfy them within the next 12 months pursuant to a relevant agreement; and
- (q) enterprises, other than the Company and subsidiaries controlled by the Company, which are controlled directly or indirectly by an individual defined in (i), (j), (n) or (p), or in which such an individual assumes the position of a director or senior executive.

32. Segment reporting

Reportable segments are identified based on operating segments which are determined based on the structure of the Group's internal organisation, management requirements and internal reporting system. An operating segment is a component of the Group that meets the following conditions:

- It engages in business activities from which it may earn revenues and incur expenses;
- Its financial performance are regularly reviewed by the Group's management to make decisions about resource to be allocated to the segment and assess its performance;
- The Group is able to obtain its financial information regarding financial position, financial performance and cash flows, etc.

Notes to the Financial Statements

For the period from 1 January 2015 to 30 June 2015

(All amounts in RMB'000 unless otherwise stated)

English Translation for Reference Only

II. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

32. Segment reporting (Continued)

Two or more operating segments may be aggregated into a single operating segment if the segments have same or similar economic characteristics, and are similar in respect of the following aspects:

- the nature of each product and service;
- the nature of production processes;
- the type or class of customers for the products and services;
- the methods used to distribute the products or provide the services;
- the legal and regulatory impact on manufacturing of products and rendering of services.

Inter-segment revenues are measured on the basis of actual transaction price for such transactions for segment reporting, and segment accounting policies are consistent with those for the consolidated financial statements.

33. Critical accounting estimates and judgments

The preparation of financial statements requires management to make estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised and in any future periods affected.

Notes IV.17, IX and XIV contain information about the assumptions and their risk factors relating to impairment of goodwill, share-based payments and fair value of financial instruments. Other key sources of estimation uncertainty are as follows:

(1) Impairment of receivables

As described in Note II.10, receivables that are measured at amortised cost are reviewed at each balance sheet date to determine whether there is objective evidence of impairment. If any such evidence exists, impairment loss is recognised. Objective evidence of impairment includes observable data that comes to the attention of the Group about loss events such as a significant decline in the estimated future cash flow of an individual debtor or the portfolio of debtors, and significant changes in the financial condition that have an adverse effect on the debtor. If there has been a change in the factors used to determine the provision for impairment which indicates that the value of the receivables has recovered, the impairment loss recognised in prior years is reversed.

Notes to the Financial Statements

English Translation for Reference Only

II. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

33. Critical accounting estimates and judgments (Continued)

(2) Provision for diminution in value of inventories

As described in Note II.11, the net realisable value of inventories is under management's regular review, and as a result, provision for diminution in value of inventories is recognised for the excess of inventories' carrying amounts over their net realisable value. When making estimates of net realisable value, the Group takes into consideration the use of inventories held on hand and other information available to form the underlying assumptions, including the inventories' market prices and the Group's historical operating costs. The actual selling price, the costs of completion and the costs necessary to make the sale and relevant taxes may vary based on the changes in market conditions and product saleability, manufacturing technology and the actual use of the inventories, resulting in the changes in provision for diminution in value of inventories. The net profit or

Notes to the Financial Statements

II. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ACCOUNTING ESTIMATES (CONTINUED)

33. Critical accounting estimates and judgments (Continued)

(6) Construction contract

As described in Note II.23, contract revenue and contract profit are recognised based on the stage of completion of a contract which is determined with reference to the proportion of the physical construction work completed to the total estimated construction work. Where a contract is completed substantially and its contract revenue and contract expenses to completion can be reliably measured, the Group estimates contract revenue and contract expenses with reference to its recent construction experience and the nature of the construction contracts. For a contract that is not completed substantially, contract revenue that should be recognised based on its stage of completion, is not recognised and disclosed in the financial statements. Therefore, at the balance sheet date, actual total contract revenue and total contract cost may be higher or lower than the estimated total contract revenue and total contract cost and any change of estimated total contract revenue and total contract cost may have financial impact on future profit or loss.

(7) Income taxes

The Group is subject to income taxes in numerous jurisdictions. There are many transactions and events for which the ultimate tax determination is uncertain during the ordinary course of business. Significant judgment is required from the Group in determining the provision for income taxes in each of these jurisdictions. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made.

Determining income tax provisions involves judgement on the future tax treatment of certain transactions. The Group carefully evaluates tax implications of transactions and tax provisions are set up accordingly. The tax treatment of such transactions is reconsidered periodically to take into account all changes in tax legislations. Deferred tax assets are recognised for tax losses not yet used and temporary deductible differences. As those deferred tax assets can only be recognised to the extent that it is probable that future taxable profit will be available against which the unused tax credits can be utilised, management's judgment is required to assess the probability of future taxable profits. Management's assessment is constantly reviewed and additional deferred tax assets are recognised if it becomes probable that future taxable profits will allow the deferred tax asset to be recovered.

Notes to the Financial Statements

5. Other receivables (Continued)

(6) Other receivables that are written off in current period

There were no material other receivables written off in current period (2014: Nil)

(7) As at 30 June 2015, the five largest balances of other receivables are analysed as follows, accumulated by arrearage parties:

Other receivables	Arrearage parties	Amount	Age	% of total
Marine Subsea & Consafe Ltd	(i) Associates	279,649	over 3 years	9.46%
China Securities Depository and Clearing Corporation Limited, Shenzhen Office	None	163,739	within 1 year	5.54%
Frigstad Deepwater Holding Ltd.	Minority shareholders of subsidiaries	137,053	1-2 year	4.63%
Dongguan Land Exchange Center	None	104,826	within 1 year	3.54%
China Merchants Property Development Co., Ltd	Significant shareholder	70,650	Over 3 years	2.39%
Total		755,917	-	25.56%

The Group's five largest other receivables as at 31 December 2014, amounted to RMB760,433,000, accounting for 28.13% of the total balance.

- (i) Raffles completed its acquisition of Gadidae AB (formerly known as Consafe MSV AB) on 31 January 2011. In the prior years Gadidae AB had been making loans to its associate, Marine Subsea & Consafe ("MSC"), which amounted to USD35,625,000 (RMB217,800,000). Raffles recognised interest income according to loan agreement and recorded expenses paid on behalf of MSC with total amount of USD10,116,000 (RMB61,849,000) from 2007 to 31 January 2011.

(8) Other receivables from shareholders holding more than 5% (including 5%) of the voting rights of the Company are analysed as follows:

As at 30 June 2015, no amount due from shareholders holding more than 5% (including 5%) of the voting rights of the Company is included in the above balance of other receivables.

Notes to the Financial Statements

IV. NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

5. Other receivables (Continued)

(9) As at 30 June 2015, other receivables from related parties are analysed as follows:

Company name	Relationship with the Group	30 June 2015		31 December 2014			Provision for doubtful debts
		Amount	% of total balance	Amount	Nature	% of total balance	
Marine Subsea & Consafe Ltd	Associates	279,649	9.46%	279,940	Funding	10.36%	-
Frigstad Deepwater Holding Ltd.	Minority shareholders of subsidiaries	137,053	4.63%	156,474	Funding	5.79%	-
China Merchants Property Development Co.,Ltd	Subsidiary of significant shareholder	70,650	2.39%	70,650	Transfer of equity	2.61%	-
Others		188,034	6.36%	194,459		7.19%	-
Total		675,386	22.84%	701,523		25.95%	-

6. Advance to suppliers

(1) Advance to suppliers are analysed by categories as follows:

	30 June 2015	31 December 2014
Raw material (including equipments for ship under construction)	3,288,074	5,282,512
Cost of ship under construction	50,290	16,001
Logistics trade	126,404	-
Others	172,450	172,284
Sub-total	3,637,218	5,470,797
Less: provision for bad debts	(247,889)	(247,446)
Total	3,389,329	5,223,351

Notes to the Financial Statements

For the period from 1 January 2015 to 30 June 2015

(All amounts in RMB'000 unless otherwise stated)

English Translation for Reference Only

IV. NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

6. Advance to suppliers (Continued)

(2) Aging analysis of advance to suppliers:

	30 June 2015		31 December 2014	
	A	(%)	Amount	(%) of total balance
Within 1 year (inclusive)	1,654,253	45.48%	4,160,801	76.05%
1 to 2 years (inclusive)	1,292,202	35.53%	931,313	17.02%
2 to 3 years (inclusive)	406,015	11.16%	42,220	0.77%
Over 3 years	284,747	7.83%	336,463	6.16%
Sub-total	3,637,217	100.00%	5,470,797	100.00%
Less: provision for doubtful debts	(247,889)	6.82%	(247,446)	4.52%
Total	3,389,328	93.18%	5,223,351	95.48%

The aging is calculated from the date of recognition of advance to suppliers.

Advance to suppliers aged over 1 year included steel purchase prepayment made to a supplier in total of RMB88,931,000 in 2008. The supplier has not delivered the steels within due date for its own reasons. As at 30 June 2015, the Group had made full provision of RMB87,640,000 for the unsettled balances (As at 31 December 2014: RMB87,640,000).

The provision for doubtful debt this period amounted to RMB795,000 (As at 31 December 2014: RMB73,205,000).

Other than the advance mentioned above, the remaining advance to suppliers aged over 1 year mainly represented prepayment for raw materials and equipment of offshore engineering projects. The advance to suppliers are not settled because the construction period of the offshore engineering project usually last more than 1 year.

IV. NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

10. Available-for-sale financial assets (Continued)

(2) Detailed information of the available-for-sale financial assets: (Continued)

Available-for-sale equity instruments measured at historical cost:

	31 December 2014	Increase in current period	Decline in current period	30 June 2015	Shareholding ratio of investee	Cash dividend in current period
Available-for-sale equity instruments						
– historical cost						
– Bank of Communications Schroder Fund Management Co., Ltd (“BOCM Schroder”)	8,125	–	–	8,125	5.00%	–
– Donghua Container Transportation Service Co., Ltd	270	–	–	270	5.00%	–
– China United International Rail Containers Co., Ltd (“CR Intermodal”)	380,780	–	–	380,780	10.00%	–
– Guangdong Samsung Enterprise Group Co., Ltd (“Guangdong Samsung”)	1,365	–	–	1,365	0.09%	–
– Beihai Yinjian Co., Ltd (“Beihai Yinjian”)	1,700	–	–	1,700	1.01%	–
– Crisplant Singapore Pte Ltd (“Crisplant”)	46	–	–	46	10.00%	–
– Others	392,286	–	–	392,286		–
– Provision for impairment	(3,065)	–	–	(3,065)		–
Total	389,221	–	–	389,221		–

Available-for-sale equity instruments measured at historical cost mainly consists of equity investment of non-listed companies, which do not have quoted price in active market. The variation of reasonable estimate of fair value is large, and the probabilities used to determine the estimation can not be reasonably confirmed. Thus, the fair value can not be evaluated reliably. The Group so far do not have plan to dispose these investments.

The Group's investment ratios in TSC, Wuhan Automobile magazine Co. Ltd., Jiangsu Ruicheng Machinery Co., Ltd, Optton Inc (Shanghai), ZPMC-Red Box Energy Services Limited, Shanghai Xiangtong Auto parts Co.,Ltd and Road Show China are all below 20%. But since the Group has appointed directors to the above mentioned associates, the Group had significant influence over them. Thus, equity investments on these associates were evaluated subsequently by equity method.

As at 30 June 2015, except for Marine Subsea & Consafe, there is no need for the Group to recognize provision for long-term equity investments in joint ventures and associates based on the provision testing result that compared the estimated recoverable amount and book value of long-term equity investments in joint ventures and associates.

IV. NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

16. Intangible assets (Continued)

(2) Land use rights are analysed by locations and durable years as follows:

	30 June 2015	31 December 2014
Outside Hong Kong – 10 to 50 years	3,241,351	3,209,531

(3) As at 30 June 2015, intangible assets with pending certificates of ownership are as follows:

Nantong Tank Land (2008) NO.0301018	67,593	in the progress
SCIMCEL Tangkeng land use right	58,464	in the progress
Nantong Tank Land (2008) No.0301030	49,000	in the progress
SCIMCEL dormitory	1,883	in the progress
Total	176,940	

After the evaluation of board of directors of the Group, the aforementioned intangible assets with pending certificates has no risk of impairment. The group assesses at the end of each reporting period whether there is objective evidence that assets other than inventory, financial assets and other long term equity investments are impaired to make sure that its carrying amount doesn't exceed its recoverable amount. If there is evidence indicates it is possible that the carrying amount of long term assets could not recover, the related asset should be deemed impaired and recognise impairment loss.

(4) As at 30 June 2015, there is no restricted intangible assets (2014: RMB145,728,000). Refer to Note IV. 22.

(5) As at 30 June 2015, the intangible asset with indefinite useful lives is Gas station Franchise which amounted to RMB53,300,000 (31 December 2014: RMB53,300,000).

Notes to the Financial Statements

IV. NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

17. Goodwill (Continued)

- (1) The recoverable amount of Enric is determined based on the present value of expected future cash flows. The present value of expected future cash flows was calculated based on the most recent ten-year financial budgets approved by management of the Group and a discounting rate of 13%. The cash flows beyond the ten-year budget period were assumed to be stable. There was no impairment considered necessary for the goodwill based on the calculations. As key assumptions on which management has made the future cash projections are subject to change, management believes that any adverse change in the key assumptions would cause the carrying amount exceeding its recoverable amount.

The calculation of present value of expected future cash flows of Enric was based on key assumptions of 15%-20% of gross profit ratio and 3%-10% of operating sales growth, which was determined by management on the basis of past performance before the budget period.

- (2) The recoverable amount of TGE SA is determined based on the present value of expected future cash flows. The present value of expected future cash flows was calculated based on the most recent ten-year financial budgets approved by management of the Group and a discounting rate of 12%. The cash flows beyond the ten-year budget period were assumed to keep stable. There was no impairment considered necessary for the goodwill based on the calculations. As key assumptions on which management has made the future cash projections are subject to change, management believes that any adverse change in the key assumptions would cause the carrying amount exceeding its recoverable amount.

The calculation of present value of expected future cash flows of TGE SA was based on key assumptions of 15% of gross profit ratio and 3%-8% of operating sales growth, which was determined by management on the basis of past performance before the budget period.

- (3) For details of goodwill arose from acquisition of Sino-Worlink International Logistics Co., Ltd. (SWL) refer to V.(1).
- (4) Impairment test for asset group including goodwill

The goodwill allocated to the asset groups and groups of asset groups are summarised by operating segments as follows:

	30 June 2015	31 December 2014
Container asset group	107,992	107,992
Road transportation vehicles asset group	71,004	71,004
Energy, chemical and food equipment asset group	882,787	886,719
Offshore engineering asset group	234,601	234,601
Logistics services asset group	105,360	88,478
Heavy truck asset group	132,145	132,145
Airport equipment asset group	97,722	108,196
Asset groups with insignificant allocation percentage of goodwill group	44,962	34,612
Total	1,676,574	1,663,747

(3) Dismission welfare

	30 June 2015	31 December 2014
Others(i)	1,136	1,289

- (i) As at 30 June 2015, the Group provide other compensation amounting to RMB1,136,000 to compensate for the termination of employment relationship.

Please refer to Note IX for cash-settled shared-based payments.

Salaries, bonus and allowances payables represent salaries accrued for current month and bonus accrued for subsidiaries in accordance with the result of annual performance and the performance assessment plan of the Group. According to the requirement of the performance assessment plan, annual accrued bonus would be paid over three years based on the percentage determined by the management; therefore, there was a balance of such accrued bonus at the end of the period.

Profit-sharing and senior management bonus is determined on the assessment of certain key performance index. The above bonus is proposed by Chief Executive Officer of the Group and the payment is subject to review and approval by board chairman and vice board chairman of the Group. The balance of Profit-sharing and senior management bonus payable was unpaid balance accrued in prior years.

29. Taxes payable

	30 June 2015	31 December 2014

IV. NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (CONTINUED)

37. Debentures payable

	31 December 2014	Interest accrued at par value	Amortisation for premium/ discount	Current period decrease	Exchange differences arising from translating foreign currencies	30 June 2015
Medium-term notes	3,996,080	104,600	(103,228)	(3,997,452)	–	
Convertible bonds	459,000	–	–	–	(480)	458,520
Total	4,455,080	104,600	(103,228)	(3,997,452)	(480)	458,520

(1) Related information is as follows:

Medium-term notes – 11CIMC MTN1	4,000,000	23 May 2011	5 years	4,000,000
Convertible bonds	471,402	10 December 2012	3 years	471,402
Total	4,471,402			4,471,402

The company issued medium-term notes (MTN) on 20 May 2011 with a ceiling of RMB6 billion to institutional investors in the national inter-bank bond market. The first phase of MTN with a total amount of RMB4 billion, a term of five years from 23 May 2011 to 22 May 2016, par value of RMB100 per note and fixed interest rate of 5.23% per annum was successfully issued publicly. Interest is to be paid on 23rd May each year in the arrears until redemption and par value is to be paid on 23 May 2016. The notes are unsecured and targets institutional investors in the national inter-bank market.

China Merchants Bank Co., Ltd. is the lead underwriter. Book building and centralised placing were adopted for this issue. The MTN recorded as debenture was subsequently measured at amortized cost using the effective interest.

NSR, a subsidiary of the financial leasing, issued three-year convertible bonds (“CB”) to third party investor on 10 December, 2012. The par value and the amount was USD75,000,000 with fixed interest rate of 5%. If NSR’s offshore drilling platform project have completed and found the eligible leasee, the CB would directly converted to the Category B shares of NSR. In addition, during the life of the CB, the bond holder has the rights to convert the CB to Category B shares of NSR. At the CB maturity date, if the holder have chosen not convert, the NSR should buy-back all the CB and ensure the redemption price could enable the holder obtain 15% internal rate of return.

According to the agreement, when the CB have converted to Category B shares of NSR, NSR should buy-back 25%, 25% and 50% of the Category B shares at the end of 3, 4, and 5 years after the issuance of CB, respectively. The redemption price would depend on the offshore drilling platform’s lease or sales price, but should make sure the original CB holder obtain not less than 15% internal rate of return. The group has made provisions of financing cost of the convertible bonds on the basis of 15% in other payables in 2014.

V. CHANGES IN THE SCOPE OF CONSOLIDATION

1. Business combinations involving enterprises not under common control

As at 30 April 2015, the group signed share transfer contracts with other shareholder of Sino-Worlink (Beijing) Investment Co., Ltd. to acquire 50% of equity interests in Sino-Worlink (Beijing) Investment Co., Ltd. at the consideration of RMB60,000,000.00.

Sino-Worlink (Beijing) Investment Co., Ltd. is registered in Beijing, mainly engaged in investment management, asset management, investment consultancy and others.

As at 30 April 2015, the group signed share transfer contracts with other shareholder of Sino-Worlink (Hong Kong) Logistics Co., Ltd. to acquire 50% of equity interests in Sino-Worlink(Hong Kong) Logistics Co., Ltd. at the consideration of RMB45,000,000.00.

Sino-Worlink (Hong Kong) Logistics Co., Ltd. is registered in Hong Kong, mainly engaged in international cargo transportation agent, warehousing service and others.

2. Disposal of subsidiaries

There is no loss of control of subsidiaries by disposal of equity interest for the current period.

VI. EQUITY IN OTHER ENTITIES

1. Equity in subsidiaries

All subsidiaries of the Group were established or acquired through combination not under common control. There is no acquisition of subsidiaries through combination under common control.

As at 30 June 2015, the number of companies included in the scope of consolidation added up to 497. Except for the subsidiaries listed as below, the number of other subsidiaries held by the Group was 269, with paid-in capital amounting to RMB60,359,719.07. Other subsidiaries mainly included those engaged in manufacturing or service provision, which have relatively small scale of operation and the paid-in capital was below RMB20 million or USD3 million. Other subsidiaries also included those investment holding companies with no operating activities registered in Hong Kong, British Virgin Islands or other overseas countries.

Notes to the Financial Statements

IX. SHARE-BASED PAYMENTS (CONTINUED)

2. Information on equity-settled share-based payment

(1) Information on equity-settled share-based payment of Enric

Enric, a subsidiary of the Company, carried out a share options plan (the "Plan I"), which was approved by the shareholders' meeting on 11 November 2009. According to the Plan, the key management personnel and other employees in Enric were granted share options of Enric at nil consideration to subscribe for shares of Enric. The options are 50% exercisable after one year from the date of grant and are then 100% exercisable after two years from the date of grant. Each option gives the holder the right to subscribe for one ordinary share in Enric. The total number of share options granted was 43,750,000, with the exercise price of HKD4 per share.

Enric carried out another share options plan (the "Plan II"), which was approved by the shareholders' meeting on 28 October 2011. According to Plan II, the board of directors of the Company was authorised to grant share options to the key management personnel and other employees of Enric at nil consideration to subscribe for shares of Enric. The options are 40% exercisable after one year from the date of grant and, 70% exercisable after 2 years from the date of grant, and then 100% exercisable after 3 years from the date of grant. Each option gives the holder the right to subscribe for one ordinary share in Enric. The total number of share options granted was 38,200,000, with exercise price of HKD2.48 per share.

Enric, a subsidiary of the Company, carried out a share options plan (the "Plan III"), which was approved by the shareholders' meeting on 5 June 2014. According to the Plan, the key management personnel and other employees in Enric were granted share options of Enric at nil consideration to subscribe for shares of Enric. The options are 40% exercisable after two years from the date of grant, 70% exercisable after three years from the date of grant and 100% exercisable after four years from the date of grant. Each option gives the holder the right to subscribe for one ordinary share in Enric. The total number of share options granted was 38,420,000, with the exercise price of HKD11.24 per share.

Movement of share options of Enric:

	30 June 2015 '000	31 December 2014 '000
Beginning balance	90,863	58,638
Granted in current period		38,420
Exercised in current period	(3,358)	(5,595)
Cancelled in current period	(30)	(510)
Forfeited in current period		(90)
Ending balance	87,475	90,863

Notes to the Financial Statements

For the period from 1 January 2015 to 30 June 2015

(All amounts in RMB'000 unless otherwise stated)

English Translation for Reference Only

IX. SHARE-BASED PAYMENTS (CONTINUED)

2. Information on equity-settled share-based payment (Continued)

(2) Information on equity-settled share-based payment of the Company

A share options scheme (the "Scheme") was approved in the shareholders' meeting of the Company held on 28 September 2010. According to the Scheme, the board of directors of the Company was authorised to grant share options to the key management personnel and other employees to subscribe for shares of the Company. The effective period of the Scheme is ten years from the first grant date of share options. The options are exercisable in two periods. The options are 25% exercisable from the first transaction date after 24 months since the grant date to the last transaction date after 48 months since grant date. The remaining 75% are exercisable from the first transaction date after 48 months since grant date to the last transaction date of the Scheme. Each option gives the holder the right to subscribe for one ordinary share in the Company. In addition, the holder must simultaneously satisfy all the conditions as follows:

- (a) The holder should pass the previous year's evaluation.
- (b) The increase of net profit attributable to ordinary shareholders of the Company after deducting nonrecurring profit or loss should not be lower than the 6% and the average return on net assets after deducting non-recurring profit or loss should not be lower than 10% for the previous year of the exercise date.
- (c) During the waiting period, the net profit attributable to ordinary shareholders of the Company and the net profit attributable to ordinary shareholders of the Company after deducting non-recurring profit or loss should not be lower than the average figures of the three fiscal years before the grant day or negative.

The total number of share options granted was 60,000,000, 54,000,000 among which were for the initial grant with exercise price of RMB12.39 per share while the remaining 6,000,000 options were for reservation.

The Company distributed a cash dividend of RMB0.35 per share, RMB0.46 per share, RMB0.23 per share, RMB0.27 per share and RMB0.31 per share on 31 May 2011, 21 June 2012, 28 June 2013, 27 June 2014 and 22 July 2015 respectively to ordinary shareholders. In accordance with the Scheme, upon the implementation of the annual dividend distribution plan for 2010, 2011, 2012, 2013 and 2014, the Board of Directors would adjust the exercise price of the aforementioned 54,000,000 share options granted on 28 September 2010. The adjusted exercise price is RMB10.77 per share.

Notes to the Financial Statements

Ending balance	60,715	46,259

(3) Equity-settled share-based payment of CIMC Tianyu

In 2013, CIMC Tianyu, one subsidiary of the Group, implemented an equity trust scheme. Through this program, employees, who participated in the scheme, bought 8% stake of CIMC Tianyu from CIMC SD, who is the direct holding company of CIMC Tianyu, through Chang'an International Trust Co. Ltd.

Since CIMC Tianyu is an unlisted company that its shares are less liquid, therefore it is hard to exit this plan because of restrictions. Also the fair value of this share-based payment is low. Therefore, the Group did not recognise corresponding equity-settled share-based payments as to this equity trust scheme.

Notes to the Financial Statements

For the period from 1 January 2015 to 30 June 2015

(All amounts in RMB'000 unless otherwise stated)

English Translation for Reference Only

IX. SHARE-BASED PAYMENTS (CONTINUED)

2. Information on equity-settled share-based payment (Continued)

(4) Basis of the best estimate of the number of equity instruments expected to vest is as follows:

At each balance sheet date during the vesting period, the Company makes the best estimation according to the latest information of the number of employees who are granted to vest and revises the number of equity instruments expected to vest. On vesting date, the estimate shall be equal to the number of equity instruments that ultimately vested.

There was no significant difference of estimation between current period and last year.

As at 30 June 2015, Accumulated amount recognised in capital reserve for equity-settled share-based payments	420,047
Total expenses recognised for equity-settled share based payments for current period including:	
– attributable to the Company	3,499
– attributable to Enric	28,166
– attributable to Raffles	

3. Information on cash-settled share-based payment

According to the approved Share Appreciation Rights Scheme (draft) Revised ("Scheme") during the board meeting of Raffles held on 27 September 2011, a subsidiary of the Group, Raffles adopted Share Appreciation Rights ("SARs") which is to grant the relevant incentive recipients the right to receive incentive amount in cash from Raffles upon the satisfaction of relevant financial performance of Raffles. Incentive amount is the excess of fair market price of A share of the Company on a particular date over the exercise price.

The scope of incentive recipients of this scheme: the appointed senior management who is non-Chinese nationality of Raffles and its subsidiaries or associates as well as person(s) who made special contribution to the company in the discretion of the board. Accordingly, there are 4 incentive recipients in the scope with total 760,000 SARs granted.

The Scheme is conditional, which sets stipulations for appraisal result of incentive recipients' performance, misconduct activity and financial performance standards of the Group to fulfil.

Notes to the Financial Statements

For the period from 1 January 2015 to 30 June 2015

(All amounts in RMB'000 unless otherwise stated)

English Translation for Reference Only

IX. SHARE-BASED PAYMENTS (CONTINUED)

3. Information on cash-settled share-based payment (Continued)

The SARs are exercisable in 2 instalments periods after 2 years from the rights grant date upon the satisfaction of exercisable conditions:

- (1) The SARs are up to 25% exercisable from the first transaction date after 24 months since grant date to the last transaction date after 48 months since grant date.
- (2) The remaining SARs up to 75% are exercisable from the first transaction date after 48 months since grant date to the last transaction date of the Scheme.

Raffles will write off the unexercised SARs after each exercise period expires if the SARs being requested for exercise by the grantee satisfying exercise conditions is less than the number of effective SARs during each period.

Raffles will write off unexercised SARs, which was granted but invalid due to un-satisfaction of the exercise condition during the exercise period, after each period expires.

The amount of accrued liabilities to cash-settled share-based payment amounted to RMB477,970. As at 30 June 2015 and the expenses recognised for cash-settle share-based payment was nil for the period.

The movement of cash-settled share options:

	30 June 2015	31 December 2014
Beginning balance	150,000	150,000
Cancelled in current period		–
Ending balance	150,000	150,000

X. CONTINGENCIES

1. Contingent liabilities

CIMC Raffles (a subsidiary of the Company) and its subsidiaries entered into vessel construction contracts and vessel leasing contracts with relevant purchasers, which involve terms of compensation for delivery postponement and termination terms. According to the relevant term of joint venture memorandum signed on 12 March 2014, the owner's compensation liability for CIMC Raffles of delivery delay will be discharged after the joint venture memorandum between them is signed and take effect. While the results depend on signing of a final joint venture agreement, the amount of the compensation for delivery postponement from contracted delivery date to future estimated actual delivery date that CIMC Raffles and its subsidiaries may need to assume a total of approximately RMB54,655,584.

2. Guarantees provided for external parties

CIMC Vehicle Group, a subsidiary of the Group, signed contracts with Bank of Communications, Bank of China, China Everbright Bank and China Merchants Bank, pursuant to which relevant banks provided guarantees in respect of banking facilities granted to the distributors and customers of CIMC Vehicle Group and its subsidiaries arising from purchase of vehicle products. As at 30 June 2015, as approved by the Board of the Company, the aggregate amount of credit facilities in respect of which CIMC Vehicle Group and its subsidiaries provided guarantees to the distributors and customers was RMB692,886,000 (31 December 2014: RMB847,892,000).

Notes to the Financial Statements

For the period from 1 January 2015 to 30 June 2015

(All amounts in RMB'000 unless otherwise stated)

XII. EVENTS AFTER THE BALANCE SHEET DATE

(1) Progress of the Non-public Additional Issue

The Company received the Approval of the Issue of Additional Overseas Listed Foreign Shares by China International Marine Containers (Group) Co., Ltd. (Zheng Jian Xu Ke [2015] No. 1749) from the CSRC on 22 July 2015 pursuant to which, the CSRC approved the Company to issue up to 286,096,100 additional overseas listed foreign shares, all of which are ordinary shares having a par value of RMB1 each.

(2) Completion of the Transaction with CFSE

The announcements, namely the Announcement of China International Marine Containers (Group) Co., Ltd. in relation to Entering into a Memorandum of Understanding with CFSE, the Supplementary Announcement of China International Marine Containers (Group) Co., Ltd. in relation to Entering into a Memorandum of Understanding with CFSE and the Announcement of China International Marine Containers (Group) Co., Ltd. in relation to Entering into an Acquisition Agreement with CFSE, were respectively disclosed on 19 November 2014, 21 November 2014 and 28 February 2015. The Company proposed to sell its 40% equity interests in Albert Ziegler GmbH ("Ziegler", a wholly-owned subsidiary of the Company) to CFSE, and as consideration, CFSE would issue new shares to the Company (the "Potential Transaction"). The new shares to be issued would be not less than 30% of the enlarged issued share capital of CFSE.

Certain conditions precedent of the acquisition mentioned above have been satisfied and the acquisition was completed on 10 July 2015.

Immediately following completion of the acquisition, Ziegler became an associated company of CFSE and also an indirect non-wholly-owned subsidiary of the Company. Through CIMC Top Gear B.V. (an indirect wholly-owned subsidiary of the Company), the Company became the single largest shareholder of CFSE and owned 1,223,571,430 shares of CFSE, accounting for 30% of the issued share capital of CFSE as at the date of the Announcement. CFSE became an associated company of the Company. Any increase in the voting rights of CFSE by the Company and/or CIMC Top Gear B.V. upon completion of the acquisition is subject to 2% creeper of Rule 26.1 of The Codes on Takeovers and Mergers and Share Buy-backs of Hong Kong. The 2% creeper is calculated based on the lowest percentage holding of the Company and/or CIMC Top Gear B.V. in CFSE within 12 months prior to the date of completion of increase in relevant voting rights.

XIII. SEGMENT REPORTING

In accordance with the Group's internal organisation structure, management requirement and internal reporting process, nine reportable segments are identified by the Group including Containers, Road transportation vehicles, Energy, chemistry and food equipment, Offshore business, Airport facilities, Logistic services, Finance, Property development and Heavy trucks. Each reportable segment is an independent business segment providing different products and services. Independent management is applied to individual business segment as different technical and market strategy are adopted. The Group reviews the financial information of individual segment regularly to determine resources allocation and performance assessment.

1. Segment profits, losses, assets and liabilities

In order to assess the segment performance and resources allocation, the Group's management review segment revenue, expenses, assets and liabilities of each segment regularly. The preparation basis of such information is detailed as follows:

Segment assets include tangible assets, intangible assets, other long-term assets and accounts receivable, etc, but exclude deferred tax assets and other un-allocated headquarter assets. Segment liabilities include payables, bank loans, provision, special payables and other liabilities, while deferred tax liabilities are exclude.

Segment profit represents revenue (including external revenue and inter-segment revenue), offsetting segment expenses, depreciation and amortisation, impairment losses, interest expenses and income attributable to individual segment. Transactions conducted among segments are under normal non-related party transaction commercial terms.

XIII. SEGMENT REPORTING (CONTINUED)

2. Geographic information

The following table sets out information about the geographical information of the Group's revenue from external customers and the Group's non-current assets (excluding financial assets and deferred tax assets, same for the below). The geographical locations of customers are based on the location at which the services were provided or the goods were delivered. The geographical locations of the specified non-current assets are based on the physical location of the assets (for fixed assets), or the location of the business to which they are allocated (for intangible assets and goodwill), or the location of operations of the associates and joint ventures.

Geographic information (according to the receiving party division)

Total	32,637,289	32,046,128	40,886,827	37,640,693

XIV. FINANCIAL RISK AND FAIR VALUES OF FINANCIAL INSTRUMENTS

The Group has exposure to the following risks from its use of financial instruments in the normal course of the Group's operations, which mainly include:

- Credit risk
- Liquidity risk
- Interest rate risk
- Foreign exchange risk

This note presents information about the Group's exposure to each of the above risks and their sources, the Group's objectives, policies and processes for measuring and managing risks and etc.

The Group aims to seek the appropriate balance between the risks and benefits from its use of financial instruments and to mitigate the adverse effects that the risks of financial instruments have on the Group's financial performance. Based on such objectives, the Group's risk management policies are established to identify and analyses the risks faced by the Group, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Group's activities. The internal audit department of the Group undertakes both regular and ad-hoc reviews of risk management controls and procedures.

Notes to the Financial Statements

For the period from 1 January 2015 to 30 June 2015

(All amounts in RMB'000 unless otherwise stated)

English Translation for Reference Only

XIV. FINANCIAL RISK AND FAIR VALUES OF FINANCIAL INSTRUMENTS (CONTINUED)

1. Credit risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. The Group's credit risk is primarily attributable to cash at bank, receivables, debt investments and derivative financial instruments entered into for hedging purposes and etc. Exposure to these credit risks are monitored by management on an ongoing basis.

The cash at bank of the Group is mainly held with well-known financial institutions. Management does not foresee any significant credit risks from these deposits and does not expect that these financial institutions may default and cause losses to the Group.

In respect of receivables, the risk management committee of the Group has established a credit policy under which individual credit evaluations are performed on all customers to determine the credit limit and terms applicable to the customers. These evaluations focus on the external ratings of the customers and their bank credit records where available and previous payment records (if available). Receivables are due within from 30 to 90 days from the date of billing. Normally, the Group does not obtain collateral from customers, but earnest or prepayment money is requested sometimes due to the customer's situation.

Most of the Group's and the Company's customers have been transacting with the Group or the Company for a long time, and losses have occurred infrequently. In monitoring customer credit risk, customers are grouped according to some factors, such as ageing and maturity date. This Group has made the provision for the significant overdue receivables at 30 June 2015.

Guideline from the Group basis to the assets of associates and jointly controlled, profit forecast of development project provide fund to associates and jointly controlled entity and continue to monitor the project progress and its operating to ensure the recoverability of the fund.

In addition, the debtors of the Group those are neither past due nor impaired mainly due to a wide range of customers for whom there was no recent history of default.

The Group's exposure to credit risk is influenced mainly by the individual characteristics and industries of each customer rather than country or area in which the customers operate and therefore significant concentrations of credit risk arise primarily when the Group has significant exposure to individual customers. At the balance sheet date, the Group and the Company had a certain concentration of credit risk, as 5.15% (2014: 10.55%) of the total accounts receivable and other receivables were due from the five largest customers of the Group.

Investments are normally made only in liquid securities quoted on a recognised stock exchange, except where entered into for long-term strategic purposes. Transactions involving derivative financial instruments are made with counterparties of sound credit standing and with whom the Group has a signed netting ISDA agreement (International Swap Derivative Association). Given their high credit standing, management does not expect any investment counterparty to fail to meet its obligations.

The maximum exposure to credit risk is represented by the carrying amount of each financial asset, including derivative financial instruments, in the balance sheet. Except for the financial guarantees given by the Group as set out in Note X, the Group and the Company do not provide any other guarantees which would expose the Group or the Company to credit risk. The maximum exposure to credit risk in respect of these financial guarantees at the balance sheet date is disclosed in Note X.

As at 30 June 2015, except the note IV.4 disclosed, the Group has no major overdue receivables (31 December 2014: Nil).

Notes to the Financial Statements

For the period from 1 January 2015 to 30 June 2015

(All amounts in RMB'000 unless otherwise stated)

XIV. FINANCIAL RISK AND FAIR VALUES OF FINANCIAL INSTRUMENTS (CONTINUED)

2. Liquidity risk

Liquidity risk is the risk that an enterprise may encounter deficiency of funds in meeting obligations associated with financial liabilities. The Company is responsible for the cash management, including short term investment of cash surpluses and the raising of loans to cover expected cash demands, for individual subsidiaries subject to approval by the Company's board when the borrowings exceed certain predetermined levels of authority. The Group's policy is to regularly monitor its liquidity requirements and its compliance with lending covenants, to ensure that it maintains sufficient reserves of cash, readily realisable marketable securities and adequate committed lines of funding from major financial institutions to meet its liquidity requirements in the short and longer term.

The following tables show the remaining contractual maturities at the balance sheet date of the Group's financial assets and financial liabilities, which are based on contractual undiscounted cash flows (including interest payments computed using contractual rates or if floating, based on prevailing interest rates at 30 June) and the earliest date the Group can be required to pay:

	30 June 2015		
	1 year or less	1-2 years	2-5 years
Financial assets			
Cash at bank and on hand	3,989,482		3,989,482
Financial assets at fair value through profit or loss	258,329		258,329
Accounts receivable			
Other receivables			
Prepaid expenses			
Other financial assets			
Financial liabilities			
Accounts payable			
Other payables			
Other financial liabilities

XIV. FINANCIAL RISK AND FAIR VALUES OF FINANCIAL INSTRUMENTS (CONTINUED)

3. Interest rate risk

The Group determines the appropriate weightings of the fixed and floating rate interest-bearing instruments based on the current market conditions and performs regular reviews and monitoring to achieve an appropriate mix of fixed and floating rate exposure.

(1) As at 30 June, the Group held the following interest-bearing financial instruments:

	30 June 2015		31 December 2014	
	Interest rate (%)	Amount	Interest rate (%)	Amount
Fixed rates interest-bearing financial instruments				
Financial assets				
– Long-term receivables	2.58%-17.53%	5,563,364	2.58%-17.53%	3,449,542
– Current portion of non-current assets	2.58%-17.53%	2,475,515	2.58%-17.53%	2,388,975
Financial liabilities				
– Short-term borrowings	1.20%-7.28%	4,977,139	1.08%-7.28%	2,645,497
– Current portion of debentures payable	5.23%	3,997,452	4.43%	2,000,000
– Current portion of long-term borrowings	3.65%-4.10%	1,029,937		
– debentures payable	5.00%	458,520	5.00%-5.23%	4,455,080
– Long-term borrowings	2.47%-6.00%	2,371,614	2.53%-6.4%	2,146,526
Total		(4,795,783)		T

Notes to the Financial Statements

(All amounts in RMB'000 unless otherwise stated)

English Translation for Reference Only

XIV. FINANCIAL RISK AND FAIR VALUES OF FINANCIAL INSTRUMENTS (CONTINUED)

3. Interest rate risk (Continued)

(2) Sensitivity analysis

As at 30 June 2015, it is estimated that a general increase/decrease of 25 basis points (31 December 2014: 25 basis points) in interest rates, with all other variables held constant, would increase/decrease the Group's net profit by RMB34,358,000 (2014: RMB31,151,000), and equity by RMB34,358,000 (2014: RMB31,151,000).

The sensitivity analysis above indicates the instantaneous change in the net profit and equity that would arise assuming that the change in interest rate had occurred at the balance sheet date and had been applied to re-measure those financial instruments held by the Group which expose the Group to fair value interest rate risk at the balance sheet date. In respect of the exposure to cash flow interest rate risk arising from floating rate non-derivative instruments held by the Group at the balance sheet date, the impact on the net profit and equity is estimated as an annualised impact on interest expense or income of such a change in interest rates. The analysis was performed on the same basis for the previous year.

4. Foreign exchange risk

The major currency received by the Group is USD and the major currency paid out is RMB. In order to avoid the risks resulting from the fluctuation of the exchange rate of RMB, in respect of accounts receivable and payables denominated in foreign currencies, the Group ensures that its net exposure is kept to an acceptable level by buying or selling foreign currencies at spot rates when necessary to address short-term imbalances.

- (1) Besides the exposure to currency risk arising from financial assets at fair value through profit or loss and financial liabilities at fair value through profit or loss disclosed in Note IV.2 and IV.24, the Group's exposure as at 30 June to currency risk arising from recognised assets or liabilities denominated in foreign currencies is follows. For presentation purposes, the amounts of the exposure are shown in RMB, translated using the spot rate at the balance sheet date. Differences resulting from the translation of the financial statements denominated in foreign currency are excluded.

	30 June 2015				31 December 2014			
	USD	EUR	HKD	JPY	USD	EUR	HKD	JPY
Cash at bank and on hand	239,232	31,535	66,584	85,558	309,333	1,125,553	23,375	34,955
Receivables	6,171,271	790,086	75,187	20,170	4,816,325	1,090,811	95,060	40,387
Short-term borrowings	(15,041,266)	(400,625)			(9,528,809)	(439,287)	(35,499)	-
Long-term receivables	2,802,257				1,474,677	-	-	-
Long-term borrowings	(10,267,033)		(79,084)		(10,119,293)	-	-	-
Payables	(2,227,117)	(655,949)	(85,817)	(1,444)	(2,532,955)	(1,124,128)	(97,735)	(5,877)
Provisions	(349,484)	(40,748)	(61)		(85,462)	(91,467)	(13)	-
Current portion of non-current liabilities	(785,598)				(685,440)	-	(574,102)	-
Gross balance sheet exposure	(19,457,738)	(275,701)	(23,191)	104,284	(16,351,624)	561,482	(588,914)	69,465

Notes to the Financial Statements

(All amounts in RMB'000 unless otherwise stated)

English Translation for Reference Only

XIV. FINANCIAL RISK AND FAIR VALUES OF FINANCIAL INSTRUMENTS (CONTINUED)

4. Foreign exchange risk (Continued)

- (2) The following are the exchange rates for RMB against foreign currencies applied by the Group and the Company:

	30 June 2015	For the Period from 1 January to 30 June 2014	30 June 2015	30 June 2014
USD	6.1275	6.1501	6.1136	6.1528
EUR	6.8166	8.4175	6.8699	8.3946
HKD	0.7903	0.7929	0.7886	0.7938
JPY	0.0509	0.0604	0.0501	0.0608

(3) Sensitivity analysis

Assuming all other risk variables remained constant, -5.60%, -4.80%, 0.47% and 2.25% strengthening of the RMB against the USD, EUR, HK dollar and Japanese Yen respectively at 30 June 2015 (-1.00%, 13.00%, 1.00% and 6.00% strengthening of the RMB against the USD, EUR, HK dollar, and Japanese Yen respectively at 31 December 2014) would have increased (decreased) equity and net profit by the amount shown below; whose effect is in RMB and translated using the spot rate at the balance sheet date:

30 June 2015		
USD	(817,225)	(817,225)
EUR	(9,925)	(9,925)
HKD	82	82
JPY	(1,760)	(1,760)
Total	(828,828)	(828,828)
31 December 2014		
USD	(100,562)	(100,562)
EUR	(54,239)	(54,239)
HKD	2,297	2,297
JPY	(3,105)	(3,105)
Total	(155,609)	(155,609)

5.60%, 4.80%, -0.47% and -2.25% weakening of the RMB against USD, EUR, HK dollar and Japanese Yen respectively at 30 June 2015 (1.00%, -13.00%, -1.00% and -6.00% weakening of the RMB against the USD, EUR, HK dollar, and Japanese Yen respectively at 31 December 2014) would have had the equal but opposite effect on the amounts shown above, on the basis that all other variables remain constant.

Notes to the Financial Statements

For the period from 1 January 2015 to 30 June 2015

(All amounts in RMB'000 unless otherwise stated)

English Translation for Reference Only

XIV. FINANCIAL RISK AND FAIR VALUES OF FINANCIAL INSTRUMENTS (CONTINUED)

4. Foreign exchange risk (Continued)

(3) Sensitivity analysis (Continued)

The sensitivity analysis above assumes that the change in foreign exchange rates had been applied to re-measure those financial instruments held by the Group which expose the Group to foreign currency risk at the balance sheet date, the analysis excludes differences that would result from the translation of the financial statements denominated in foreign currency. The analysis is performed on the same basis for the previous year.

The above sensitive analysis does not include exposure to currency risk arising from foreign future contracts, Japanese Yen exchange option and swap contract for interest rate disclosed in Notes IV.2 and IV.24 about financial assets at fair value through profit or loss and financial liabilities at fair value through profit or loss, but the change in exchange rate may have effect on shareholders' equity and net profit.

5. Other price risks

Other price risks are stock price risk. As at 30 June 2015, the Group held 40,414,000 tradable shares of Qingdao Port International Co., Ltd.

As at 30 June 2015, it is estimated that a general increase/decrease of the comprehensive index of H-shares 5.00% (31 December 2014: 5.00%), with all other variables held constant, would increase/decrease the Group's shareholders' equity by RMB7,282,000 (31 December 2014: RMB10,399,000).

The sensitivity analysis above arise assuming that the change in the comprehensive index of H-shares occurred at the balance sheet date is reasonable and had been applied to re-measure those investments in securities held by the Group. The sensitivity analysis is also based on another assumption, namely, the fair value of the investments in securities held by the Group is relevant to composite index of stock market, and available-for-sales securities investment has same risk factor as trading securities investment, and all other variables held constant. 20.00% change in the comprehensive index of H-shares is a reasonable expectation of the Group for the period from the balance date to the next balance sheet date.

Notes to the Financial Statements

For the period from 1 January 2015 to 30 June 2015

(All amounts in RMB'000 unless otherwise stated)

English Translation for Reference Only

XIV. FINANCIAL RISK AND FAIR VALUES OF FINANCIAL INSTRUMENTS (CONTINUED)

6. Estimates of fair value of financial instruments

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2: Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices);

Level 3: Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs).

(1) assets continuously measured at fair value

The following table presents the Group's assets and liabilities that are measured at fair value in the above three levels as at 30 June 2015:

Assets	Note	Level 1	Level 2	Level 3	Total
Financial assets at fair value through profit or loss					
Investments in equity instrument held for trading	IV.2	150,864			150,864
Derivative financial assets	IV.2		106,856		106,856
Hedging Instrument	IV.2		609		609
Sub-total		150,864	107,465		258,329
Available-for-sale financial assets	IV.10	4,320			4,320
Total		155,184	107,465		262,649

Liabilities	Note	Level 1	Level 2	Level 3	Total
Financial liabilities at fair value through profit or loss					
Derivative financial liabilities	IV.24		(36,703)		(36,703)
Hedging Instrument	IV.24		(3,590)		(3,590)
Financial guarantee contracts	IV.24			(46,221)	(46,221)
Total			(40,293)	(46,221)	(86,514)

Notes to the Financial Statements

For the period from 1 January 2015 to 30 June 2015

(All amounts in RMB'000 unless otherwise stated)

English Translation for Reference Only

XIV. FINANCIAL RISK AND FAIR VALUES OF FINANCIAL INSTRUMENTS (CONTINUED)

6. Estimates of fair value of financial instruments (Continued)

(1) assets continuously measured at fair value (Continued)

The following table presents the Group's assets and liabilities that are measured at fair value in the above three levels as at 31 December 2014:

Assets	Note	Level 1	Level 2	Level 3	Total
Financial assets at fair value through profit or loss					
Investments in equity instrument held for trading	IV.2	403,709	–	–	403,709
Derivative financial assets	IV.2	–	22,741	–	22,741
Hedging Instrument	IV.2	–	1,219	–	1,219
Sub-total		403,709	23,960	–	427,669
Available-for-sale financial assets	IV.10	6,514	–	–	6,514
Total		410,223	23,960	–	434,183

Liabilities	Note	Level 1	Level 2	Level 3	Total
Financial liabilities at fair value through profit or loss					
Derivative financial liabilities	IV.24	–	(148,669)	–	(148,669)
Hedging Instrument	IV.24	–	(10,384)	–	(10,384)
Financial guarantee contracts	IV.24	–	–	(18,488)	(18,488)
Total		–	(159,053)	(18,488)	(177,541)

The Group make the date when matters occurred which result in significant transfers between instruments in the three levels as the point of transfer. During the period, there were no significant transfers between instruments in Level 1 and Level 2 neither nor Level 2 and Level 3.

For traded in active markets financial instruments, the group measures its fair value at an active market price; For not traded in active markets financial instruments, the group uses valuation techniques to determine the fair value. Valuation model mainly used are the discounted cash flow model and market comparable company model etc.. Input values of the valuation techniques include the risk free interest rate, benchmark interest rate, exchange rate, credit spreads, liquidity premium, EBITDA multiplier, the lack of liquidity discount etc.

Notes to the Financial Statements

For the period from 1 January 2015 to 30 June 2015

(All amounts in RMB'000 unless otherwise stated)

English Translation for Reference Only

XIV. FINANCIAL RISK AND FAIR VALUES OF FINANCIAL INSTRUMENTS (CONTINUED)

6. Estimates of fair value of financial instruments (Continued)

(2) Assets and liabilities not measured at fair value but disclosed at the fair value

Financial assets and liabilities in the group measured by the amortized cost method of including: accounts receivable, short-term borrowings, accounts payable, long-term borrowings, debentures payables, long-term payables etc.

As at 30 June 2015, All financial instruments are carried at amounts not materially different from their fair value.

There is an active market for bonds payable and fair value is determined by the quotations in the active market, which belongs to the first level. Fair value of long-term borrowings, long-term payables and debentures payables with no active market is determined by the discounted future cash flow of the contract in accordance with interest that is comparable and offer the same cash flow under the same conditions, which belongs to the third level.

(3) Estimation and assumption of fair values

The following summarises the major methods and assumptions used in estimating the fair values of financial assets at fair value through profit or loss and financial liabilities at fair value through profit or loss, available-for-sale financial assets on the balance sheet date.

(a) *Equities*

Fair value is based on quoted market prices at the balance sheet date for fair values of financial assets at fair value through profit or loss and financial liabilities at fair value through profit or loss (excluding derivatives), and available-for-sale financial assets if there is an active market.

(b) *Receivables*

The fair value is estimated as the present value of the future cash flows, discounted at the market interest rates at the balance sheet date.

(c) *Borrowings, debentures payable, long-term payables and other non-derivatives financial liabilities*

The fair value of borrowings, debentures payable, long-term payables and other non-derivatives financial liabilities is estimated as the present value of future cash flows, discounted at the market rate of interest at the balance sheet date.

(d) *Derivatives*

The fair value of forward exchange contracts is either based on their listed market prices or by discounting the contractual forward price and deducting the current spot rate. The fair value of interest rate swaps is based on broker quotes. The quotes are tested for reasonableness by discounting estimated future cash flows based on the terms and maturity of each contract and using market interest rates for a similar interest rate instrument at the measurement date.

Notes to the Financial Statements

For the period from 1 January 2015 to 30 June 2015

(All amounts in RMB'000 unless otherwise stated)

English Translation for Reference Only

XIV. FINANCIAL RISK AND FAIR VALUES OF FINANCIAL INSTRUMENTS (CONTINUED)

6. Estimates of fair value of financial instruments (Continued)

(3) Estimation and assumption of fair values (Continued)

(e) Financial guarantees

The fair value of financial guarantees issued is determined by reference to fees charged in an arm's length transaction for similar services, when such information is obtainable, or is otherwise estimated by reference to interest rate differentials, by comparing the actual rates charged by lenders when the guarantee is made available with the estimated rates that the lenders would have charged, had the guarantees not been available, where reliable estimates of such information can be made.

(f) Interest rates used for determining fair value

The interest rates used to discount estimated cash flows are based on same term loans' rates announced by People's Bank of China at the balance sheet date plus an adequate credit spread and are as follows:

	30 June 2015	31 December 2014
Borrowings	1.75%-5.99%	1.75%-5.99%
Receivables	5.40%-6.55%	5.60%-6.55%

Notes to the Financial Statements

For the period from 1 January 2015 to 30 June 2015

(All amounts in RMB'000 unless otherwise stated)

XV. CAPITAL MANAGEMENT

The Group's objectives of managing capital are to safeguard the group's ability of sustainable development in order to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital.

In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

Total capital of the group is shareholders' equity shown in the consolidated balance sheet. The group is not subject to external mandatory capital requirements, and use debt to asset ratio to monitor capital.

The Group monitors capital on the basis of Debt-Asset ratio. This ratio is calculated as total liabilities divided by total assets.

As in 2015 the Group manages capital status by controlling the Debt-Asset ratio not to exceed 70%(2014: 70%). The Debt-Asset ratio as at 30 June 2015 and 31 December 2014 were as follows:

	30 June 2015	31 December 2014
Total liabilities	65,362,621	60,494,066
Total assets	95,593,491	87,776,181
Asset-liability ratio	68%	69%

XVI. NOTES TO THE HOLDING COMPANY'S FINANCIAL STATEMENTS

1. Cash at bank and on hand

	30 June 2015	31 December 2014
Bank deposits	1,442,650	1,773,195
Other cash balances	271,860	2,454
	1,714,510	1,775,649
Including: cash abroad	8	8

As at 30 June 2015, restricted cash at bank and on hand of the Company amounted to 2,436,000 (31 December 2014: 2,437,000).

As on 30 June 2015, the fixed deposit of the company in the financial company, a subsidiary of the group, was RMB942,000,000 (31 December 2014: RMB942,000,000).

XVI. NOTES TO THE HOLDING COMPANY'S FINANCIAL STATEMENTS (CONTINUED)

4. Other receivables (Continued)

(3) Other receivables are analysed by categories as follows:

Note	30 June 2015				31 December 2014				
	Amount		%		Ending balance		Provision for bad debts		
	A	%	A	%	Amount	% of total balance	Amount	% of total balance	
Other receivables with amounts that are individually significant	(4)	9,475,917	99.40%			7,176,065	99.36%	-	-
Other receivables with amounts that are not individually significant		57,606	0.60%	4,580	7.95%	46,189	0.64%	4,580	9.92%
Total		9,533,523	100.00%	4,580	0.05%	7,222,254	100.00%	4,580	0.06%

There were no collaterals that the Company held for other receivables that were made impairment aforesaid.

(4) As at 30 June 2015, other receivables with amounts that are individually significant and that the related provision for bad debts is provided on the individual basis

As at 30 June 2015, the Company has no other receivables with amounts that are individually significant and that the related provision for bad debts is provided on the individual basis (31 December 2014: Nil).

(5) As at 30 June 2015, other receivables with amounts that are not individually significant but that the related provision for bad debts is provided on the individual basis.

As at 30 June 2015, the Company has no other receivables with amounts that are not individually significant but that the related provision for bad debts is provided on the individual basis (31 December 2014: Nil).

(6) Other receivables that the related provision for bad debts is provided on grouping basis using the ageing analysis method are analysed as follows:

	30 June 2015				31 December 2014		
	Amount		%		Ending balance	Provision for bad debts	
	A	A			Amount	Amount	Ratio
Within 1 year	43,426				31,999	-	-
1 to 2 years	8,935				8,935	-	-
2 to 3 years	665				675	-	-
3 to 4 years					-	-	-
4 to 5 years	2,000	2,000	100%		2,000	2,000	100%
Over 5 years	2,580	2,580	100%		2,580	2,580	100%
Total	57,606	4,580	7.95%		46,189	4,580	9.92%

Notes to the Financial Statements

For the period from 1 January 2015 to 30 June 2015

(All amounts in RMB'000 unless otherwise stated)

English Translation for Reference Only

XVI. NOTES TO THE HOLDING COMPANY'S FINANCIAL STATEMENTS (CONTINUED)

4. Other receivables (Continued)

(7) The recovery of provision in current period

There were no other receivables that the related provision for bad debts had been provided in full amount or in large proportion in previous years but are collected or reversed in full amount or in large proportion in current year (2014: Nil).

(8) Other receivables that are written off in current period

There were no material other receivables that are written off in current period (2014: Nil).

(9) As at 30 June 2015, the five largest other receivables are analysed as follows:

		A	A	%	
CIMC HK	fund transfer, daily transfer	2,026,610	Within 1 year	21.26%	-
CIMC SD	fund transfer	1,283,074	Within 1 year, 1 to 2 years	13.46%	-
C&C Trucks	fund transfer	898,819	Within 1 year	9.43%	-
Hongxin Berg	fund transfer	760,038	Within 1 year	7.97%	-
CIMC SD	fund transfer	436,319	Within 1 year, 1 to 2 years	4.58%	-
Total		5,404,860		56.69%	-

The Company's five largest other receivables as at 31 December 2014 amounted to RMB3,330,368,000 accounting for 46.12% of the total other receivables.

(10) Other receivables from shareholders holding more than 5% (including 5%) of the voting rights of the Company are analysed as follows

As at 30 June 2015, no amount due from shareholders holding more than 5% (including 5%) of the voting rights of the Company is included in the above balance of other receivables.

Notes to the Financial Statements

XVI. NOTES TO THE HOLDING COMPANY'S FINANCIAL STATEMENTS (CONTINUED)

5. Available-for-sale financial assets (Continued)

(1) Related information analysis of available-for-sale financial assets is as follows:

Available-for-sale financial assets measured at cost:

	31 December 2014	Increase in this period	Reduction in this period	30 June 2015	Share holding (%)	Cash dividend declared
Available-for-sale equity instruments						
– cost						
– Bocm Schroder Stolt Fund Management	8,125	–	–	8,125	5.00%	–
– China Railway United Logistics	380,780	–	–	380,780	10.00%	–
– Guangdong Samsung	1,365	–	–	1,365	0.09%	–
– Beihai Yinjian	1,700	–	–	1,700	1.01%	–
Sub-total	391,970	–	–	391,970		–
Less: provision for impairment	(3,065)	–	–	(3,065)		–
Total	388,905	–	–	388,905		–

(2) Available-for-sale financial assets measured at cost held by the group are mainly unlisted equity investments with no active market price and their reasonable fair value estimates has large variation range; the probability determining the fair value estimate can not be reasonably determined so their fair value cannot be reliably measured. The group has no disposal of the investment plan.

6. Long-term equity investments

(1) Long-term equity investments are analysed by categories as follows:

	30 June 2015 '000	31 December 2014 RMB'000
Subsidiaries		
– Unlisted companies ⁽²⁾	8,194,997	8,426,789
Joint ventures, unlisted ⁽³⁾	3,575	3,655
Subtotal	8,198,572	8,430,444
Less: provision for impairment	–	–
Total	8,198,572	8,430,444

There is no restriction on sale of the long-term equity investments held by the Company.
